SIA GRUNDFOS PUMPS BALTIC

TEGEVUSARUANNE

SIA Grundfos Pumps Baltic (registri number 4000350015) peamine eesmärk on pumpade ja pumbasüsteemide müük. Alates 1. juuli 2010. a tegutseb ettevõtte kõikides Balti riikides ning on registreerinud filiaale Eesti ja Leedu turgudel.

2014. aastal saavutas ettevõtte 0,6% netomüügi kasvu võrreldes eelmise aastaga. Balti riikide müügitgevus on näidanud erinevaid trende: suurim kasv on toimunud elamute ja ärihoonete pumbasüsteemides, samal ajal kui müük on langenud tööstus- ja veekasutusprojektides, mis on seletatav nende projektide rahastamise vähenemisega Euroopa Liidu poolt. Tulemuste riikidevahelise võrdluse põhjal eristub Läti oma müügi kasvuga, Leedus on toimunud väike, kuid stabiilne tõus ning Eesti tulemused näitavad väikest langust.

Ettevõtte brutokasumlikkus langes 2014. a 29%-ni (2013. a – 32%). Võrreldes 2013. aastaga on ettevõtte kogutegevuskulud 2013. aastal vähenenud 2% võrra, halduskulude vähendamise ja vääringute vahetuskursside kahjumi arvelt. Samas vähendas brutokasumlikkuse langus ettevõtte kasumit.

2014. aastal jätkas ettevõtte investeerimist põhivaradesse, investeerides infotehnoloogiasseadmetesse.

Juhatus teeb ettepaneku jaotada osa 2014. aasta kasumist dividendidena summas 615000 EUR.

2015. aasta peamised eesmärgid on suurendada müüki kutsealastes sektorites – tööstus- ja veekasutussüsteemid, ja parandada teenuste müüki, kombineerides uusimaid pumbatehnoloogiaid energiatõhusate juhtseadmetega. Eriline tähelepanu suunatakse edasimüügi ja teenustega tegelevate partnerite kutsealasele koolitusele.

Ettevõtte juhatus vastutab käesoleva raamatupidamise aruande eest.

Majandusaastaaruanne on koostatud vastavalt Läti vabariigis kehtivatele seadustele ja annab ettevõtte finantsolukorrast tõese ja erapooletu ülevaate.

Pärast bilansi koostamist ei leidnud aset mingeid sündmusi, mis nõuaksid 2014. a. raamatupidamise aastaaruande korrigeerimist või sündmuse avalikustamist.

16. veebruari 2015. a allkirjastasid tegevusaruande ettevõtte nimel järgmised ettevõtte esindajad:

1. ÜLDINE INFORMATSIOON

Grundfos Pumps Baltic, mis kuulub täielikult Grundfos Holding A/S-le ning mille juriidiline aadress on Poul Due Jensen's Vej 7, 8850 Bjeningbro, Taani, asutati 30.juuni 2000.aastal. 29.septembril 2010. aastal ühines ettevõtte Grundfos Pumps Eesti OU (Eesti) ja Grundfos Pumps UAB-ga (Leedu).

Ettevõtte põhitegevus on mehaaniliste pumpade ja lisaseadmete hulgimüük. Lisatud raamatupidamise aastaaruanne sisaldab 2013.a ja 2014.a. finantsandmeid ka ettevõtte Eesti ja Leedu filiaalide kohta.

2. OLULISED ARVESTUSPÕHIMÕTTED***Koostamise alused***

Raamatupidamise aastaaruanne on koostatud soetusmaksumuse meetodil. Raamatupidamise aruanne on koostatud kooskõlas Läti Vabariigi raamatupidamise ja majandusaastaaruande seadustega.

Lisatud raamatupidamise aastaaruanne on esitatud Läti riigi vääringus, eurodes (EUR). Edaspidi kirjeldatud arvestuspõhimõtted on kooskõlas eelmistes aruandeperioodides kasutatuga.

Välisvaluutade konverteerimine

Lisatud raamatupidamise aruanne on esitatud Euroopa Liidu vääringus, eurodes (edaspidi – EUR), mis on ettevõtte arvestus- ja esitusvaluuta. Kuni 1.jaanuarini 2014.a, kui Läti liitus Eurotsooniga ja Läti latti asendati euroga, pidas ettevõtte arvestust ja koostas raamatupidamise aastaaruannet Läti lattides. Alates sellest kuupäevast on ettevõtte pidanud arvestust eurodes. Euro konverteerimisel kasutati Läti Panga ametlikku vahetuskurssi 1 EUR/0.702804 Läti latti.

Kuni 1.jaanuarini 2014.a. konverteeriti kõik välisvaluutas kajastatud tehingud Läti lattidesse tehingupäeval kehtinud Läti Panga ametliku vahetuskursi järgi. Alates 1. jaanuarist 2014.a, kõik välisvaluutas kajastatud tehingud konverteeritakse eurodeks vastavalt tehingupäeval kehtinud Euroopa Keskpanga vahetuskursile. Bilansiaruandes konverteeritakse välisvaluutas kajastatud rahalised varad ja kohustused vastavalt 31.detsembril kehtinud Euroopa Keskpanga vahetuskursile.

Euroopa Keskpanga esitatud vahetuskursid on järgmised:

	31.12.2014	31.12.2013
	EUR	EUR
1 USD	0.82366	0.72511
1 LTL	0.28962	0,28962

Sellistest tehingutest ja välisvaluutas kajastatud rahaliste varade ja kohustuste eurodeks konverteerimisel tekkinud kasumid ja kahjumid arvestatakse aruandes kasumiks või kahjumiks.

Tulude arvestus

Äritegevuse tulu koosneb eelarveaastal esitatud kaupade ja teenuste osutamise eest esitatud arvetest, ilma käibemaksu ja hinnaalandusteta, mis seostuvad netokäibega.

müügist saadud tulu kajastatakse siis, kui kõik järgmised tingimused on täidetud:

- ettevõtte on andnud ostjale üle kõik kaupade omandiga seotud olulised riskid ja hüved;
- ettevõttel ei ole omandiõigusega seotuvat jätkuvat haldusvastutust ega tegelikku valitsevat mõju müüdud kauba üle;
- tulu suurust on võimalik usaldusväärselt mõõta;
- and on tõenäoline, et ettevõtte saab tehingust tulenevalt majanduslikku kasu, ja
- tehingust tulenevaid tehtud või tehtavaid kulutusi on võimalik usaldusväärselt mõõta.

31. DETSEMBRIL 2014 LÖPPENUD MAJANDUSAASTA
RAAMATUPIDAMISE AASTAARUANDE LISAD**Põhivarad**

Põhivara on näidatud soetusmaksumusena, millest on maha lahutatud amortisatsioon. Kõigi soetusmaksumusega arvestatud põhivara amortisatsioon arvutatud lineaarsel meetodil. Kasutatakse järgmisi amortisatsiooni aastanorme:

Kontorimööbel ja –seadmed	10% - 12.5%
Arvutid	33%
Muu põhivara	20% - 33%

Rent

Rente liigitatakse kapitalirendiks, kui renditingimused näevad ette sisuliselt kõikide riskide ja hüvede üle kandmist omanikult rendilevõtjale. Kõik muu rent liigitatakse kasutusrendiks.

Varad

Varasid näidatakse kas maksumuse või neto realiseerimisväärtuse alusel. Varade soetusmaksumus koosneb ostuhinnast, impordimaksust ja muudest lõivudest ning tasudest, sealhulgas transpordikuludest ja muudest varade praegusesse asukohta ja seisukorras toomisega seotud otsestest kuludest. Varude bilansilist väärtust vähendatakse tehtud hinnaalanduste, kulude vähendamiste ja sarnase toetuste võrra.

Netorealiseerimisväärtus on tavapärasel äritegevuses kasutatav varade hinnanguline müügihind, millest on maha arvatud toote lõpetamiseks ja müügi sooritamiseks vajalikud hinnangulised kulutused.

Varade soetusmaksumus saadakse kaalutud keskmise maksumuse/lihtjärjekorra (FIFO) meetodil.

Vajadusel tehakse alahindlus vananenud, halvasti töötavatele ja rikkis varadele. Allahindluse suurus esitatakse kasumiaruandes müüdud toodete kuluna.

Nõuded ostjate vastu

Nõudeid ostjate vastu näidatakse nende nominaalväärtuses, mida on vähendatud asjakohase allahindlusena ebatõenäoliste ja halbade võlgade puhul. Ettevõtte dokumenteerib ebatõenäoliste ja halbade nõuete allahindlused vastavalt nende arvestuste vananemise analüüsile. Allahinduse suurus hinnatakse individuaalselt, nii et see peegeldaks võla suurust, makseaga ja kliendi krediidi ajalugu.

Raha ja selle ekvivalendid

Rahana kajastatakse panga arvelduskontol olevat raha. Rahavoogude aruanne koostatakse kooskõlas kaudse meetodiga, et viia äritegevustest tulev kasum vastavusse äritegevuse rahavooga.

Võlad tarnijatele

Bilansis näidatakse võlgasid nende nominaalväärtuses.

Võlad

Esmaseid laenusid näidatakse saadud rahalistest vahenditest lahutades laenu saamisega seotud kulud.

Laenukasutuse kulud

Kõik laenukasutusega seotud kulud kajastatakse seotud perioodil ja esitatakse „intresside ja sarnaste kulude“ real.

Ettevõtte rentnikuna

Kasutusrendi all tehtavaid makseid kajastatakse kasumiaruandes lineaarselt rendiperioodi jooksul.

Kui ettevõtte on kapitalirentnik, siis näidatakse bilansis vara kui materiaalse põhivara objekti ning rendikohustust mõõdetakse renditud vara õiglases väärtuses ja rendimaksete miinimumsumma nüüdsväärtuses. Iga rendimakse jagatakse kohustuseks ja finantskuludeks selliselt, et tasumata finantssaldo määr püsiks ühtlane. Rendimaksete hulka kuuluvaid intresse kajastatakse kasumiaruandes rendiperioodi jooksul. Kapitalirendiga soetatud materiaalne vara amortiseeritakse vara lühema kasuliku eluea ja rendiaja jooksul, välja arvatud juhul kui ollakse piisavalt kindel, et ettevõtte saavutab rendilepingu lõpuks omandi.

31. DETSEMBRIL 2014 LÕPPENUD MAJANDUSAASTA
RAAMATUPIDAMISE AASTAARUANDE LISAD

Puhkusetasu eraldised

Eraldised arvutatakse kõikide töötajate eraldiste kogusummana, arvestades iga töötaja keskmist päevapalka ja teenitud puhkusepäevade arvu.

Garantiide andmine

Garantiide andmist hinnatakse müükide, garantiiperioodide ja garantiinõuete ajaloo põhjal.

Seotud osapooled

Osapooli loetakse seotuks, kui üks osapool omab kontrolli teise osapoole üle või olulist mõju teise osapoole ärilistele otsustele. Seotud osapooled defineeritakse kui aktsionärid, kõrgema taseme juhtkond, haldusnõukogu ja järelevalveorgani liikmed, nende lähedased ja ettevõtted, kes otseselt või kaudselt vahendajate kaudu kontrollivad või on esitatud üksuse kontrollitavad või ühise kontrolli all.

Ettevõtte tulumaks

Ettevõtte tulumaksu arvutatakse perioodi maksustatava tulu põhjal vastavalt Läti maksuseadustele. Läti maksuseadustes toodud maksumäärad on järgmised: 2014 – 15%, 2013 - 15%.

Läti Vabariigis teenitud kasumi ettevõtte tulumaks arvutatakse ja makstakse Läti Vabariigis. Leedus teenitud kasumit või kahjumit ei arvestata ettevõtte tulumaksu arvutustes, mida tehakse vastavalt Läti ettevõtte tulumaksu seadusele.

Kasumi jaotamiselt arvutatud maksu vähendatakse Eestis makstud maksu osa võrra, tehes ümberarvutusi 15%-lise maksumääraga.

Edasilükkunud ettevõtte tulumaks

Edasilükkunud tulumaksu näidatakse raamatupidamise aastaaruandes esitatud varade ja kohustuse bilansiliste maksumuste ja maksustava kasumi arvutamisel kasutatud vastava maksumäära erinevusena, ja seda arvestatakse bilansi kohustise meetodi kasutamisel. Edasilükkunud tulumaksu kohustist arvutatakse vastavalt maksumääradele, mida arvatakse kehtivat, kui ajutised ajalised erinevused tühistuvad. Peamised ajutised ajalised erinevused tekivad peamiselt põhivarade erinevatest arvestuse ja maksude amortisatsioonimäärade erinevustest. Kui edasilükkunud tulumaksu varad tekivad, siis seda näidatakse ainult raamatupidamise aastaaruandes, kus selle kaetavust hinnatakse mõistliku kindlusega.

Proгноoside kasutamine

Läti Vabariigi seadusandlus nõuab, et raamatupidamise aastaaruande koostamisel teeb ettevõtte juhtkond hinnanguid ja prognoose, mis mõjutavad esitatud varade ja kohustuse suurust ning avalikustab bilansivälised varad ja kohustused raamatupidamise aastaaruande koostamise seisuga ja esitatud tulude ja kulude suurused aruandeaastal. Tegelikud tulemused võivad erineda nendest hinnangutest.

Järgnev teave on tulevikku puudutavad olulised hinnangud ja kalkulatsioonid ning muud hindamisebalkinduse allikad, mis eksisteerivad raamatupidamise aastaaruande esitamise kuupäeval ning millega kaasnev oluline risk võib põhjustada varade ja kohustiste bilansiliste maksumuse korrigeerimist järgmisel majandusaastal.

Ebatõenäoliselt laekuvate ja halbade ostjatele esitatud nõuete alandamine

Ettevõtte juhtkond hindab ostjatele esitatud nõuete bilansilist maksumust ja hindab nende kaetavust, alandades vajadusel ebatõenäoliselt laekuvate ja halbade nõuete suurust. Ettevõtte juhtkond on hinnanud ostjatele esitatud nõudeid ja on seisukohal, et seisuga 31.detsember 2014.a. ei ole vajadust teha märkimisväärsed täiendavaid allahindlusi.

SIA GRUNDFOS PUMPS BALTIC

31. DETSEMBRIL 2014 LÕPPENUD MAJANDUSAASTA RAAMATUPIDAMISE AASTAARUANDE LISAD

Varade netorealiseerimisväärtus

Ettevõtte juhtkond hindab varade netorealiseerimisväärtust tuginedes prognoositud müügihindadele ja –kuludele ning hindab varade tööseisundit iga-aastase inventuuri tegemisel. Kui varade netorealiseerimisväärtus on madalam kui varade soetusmaksumus, siis kajastatakse väärtuse langus. Ettevõtte juhtkond on hinnanud varade netorealiseerimisväärtust ning on seisukohal, et seisuga 31.detsember 2014.a ei ole vajadust märkimisväärse täiendava varade väärtuse langetamise järele.

Garantiieraldised

Garantiieraldisi tehakse 0,6% aruandeaastal müüdud kaupade kogukulust vastavalt ettevõtte mineviku kogemustele. Ettevõtte juhtkond on seisukohal, et seisuga 31.detsember 2014.a ei ole vajadust märkimisväärselt täiendavate garantiieraldiste järele.

Materiaalse põhivara kasulik eluiga

Materiaalse põhivara kasulikkude eluiga hinnatakse igal bilansipäeval ja muudetakse vajadusel, et kajastada ettevõtte juhtkonna hetkearvamust põhivara kasulikkude elueast seoses tehnoloogia muutusega, allesjäänud varade prognoositava majandusliku kasutusega ja nende tööseisukorraga.

Materiaalse põhivara bilansiline maksumus

Ettevõtte juhtkond vaatab materiaalse põhivara bilansilise maksumuse üle ja hindab seda, kui esinevad viited, et varade kaetavad väärtused on madalamad kui nende bilansilised maksumused. Ettevõtte juhtkond arvutab ja dokumenteerib materiaalse põhivara väärtuse langemise, tuginedes oodatava tulevikukasutuse, planeeritud likvideerimise ja varade müügiga seotud hinnangutele. Võttes arvesse ettevõtte planeeritud tegevusi ja varade prognoositavat turuväärtust, on ettevõtte seisukohal, et seisuga 31.detsember 2014.a ei ole vajadust teha märkimisväärselt korrigeerimisi materiaalse põhivara bilansilistes maksumustes.

** Grundfos Holding AS saadud tulu juhtimisteenuste eest 2013.aastal oli 151,223 EUR

31. detsembril 2013.a. sai ettevõtte Grundfos Holding AS-lt järgmised lühiajalised laenud:

- 2,000,000 LTL (580,532 EUR) tagasimakse ajaga 31.jaanuar 2014 ja fikseeritud intressimäär 1,97% aastas, intressimakse oli 5,363 LTL (1,557 EUR);
- 1,500,000 LTL (EUR 435,399) tagasimakse ajaga 31.jaanuar 2014 ja fikseeritud intressimäär 1,97% aastas, intressimakse oli 2,298 LTL (667 EUR).

Kõik laenud olid tagatiseta. Laenud makstakse tagasi ja refinantseeritakse alates käesoleva raamatupidamise aastaaruande kinnitamise kuupäevast.

22. TULEVIKUKOHUSTUSED JA -SÜNDMUSED

Ettevõtte rendib autosid kasutusrendi alusel. Kasutusrendilepingus esitatud järgmised maksed:

- Kuni 1 aasta 38,918 EUR
- 2-4 aastat 231,375 EUR

**31. DETSEMBRIL 2014 LÖPPENUD MAJANDUSAASTA
RAAMATUPIDAMISE AASTAARUANDE LISAD**

Ettevõtte üüripindade kokkuleppeperioodid on erinevad ja näevad ette järgmisi makseid:

- kuni 1 aasta EUR 40,809
- 2-3 aastat EUR 2,423

23. FINANTSRISKIDE JUHTIMINE

Ettevõtte tegevusega kaasnevad mitmed finantsriskid: valuutarisk, intressimäära risk, krediidirisk ja likviidsusrisk.

Valuutarisk

Valuutarisk on ettevõtte finantskahjumi risk, mis on tekkinud välisvaluuta vahetuskursside ebasoodsast kõikumisest. Risk tekib, kui välisvaluutas finantsvarad ei vasta selle valuuta finantskohustusele, millega kaasnevad avatud valuutaposisioonid. Ettevõttel puuduvad peale euro muus vääringus finantsvarad ja –kohustused. Seetõttu ei olnud ettevõttel märkimisväärt valuutariski aruandeaastal.

Intressimäära risk

Intressimäära risk on ettevõtte finantskahjumi risk, mis on tekkinud intressimäärade ebasoodsast kõikumisest. Ettevõtte intressirisk tekib peamiselt ujuva intressimääraga pika- ja lühiajalistest pangalaenudest. See toob ettevõttele kaasa riski, et intressikulud kasvavad olukorras, kus intressimäärad suurenevad.

Krediidirisk

Krediidirisk on finantskahjumi risk, mis tekib vastaspoole ettevõtte kohustuste täitmatajätmisest. Krediidirisk tekib peamiselt seoses pankade rahalise ja lühiajaliste hoiustega, ostjate vastu esitatud nõuetega ja väljaantud lühi- ja pikaajaliste laenudega.

Likviidsusrisk

Likviidsusrisk on risk, et ettevõtte ei suuda täiel määral oma kohustusi täita õigeaegselt. Likviidsusrisk tekib, kui finantsvarade ja –kohustuste tähtjad erinevad. Ettevõtte likviidsusrisi juhtimise eesmärk on säilitada piisav summa raha ja selle ekvivalente ja tagada võimalik rahastus piisava suurusega võetud panga krediidiliini kaudu (Lisa 12), et oma võlgade õigeaegselt tasumiseks. Ettevõtte hindab regulaarselt tagasimakse aja vastavust oma finantsvarade ja –kohustustega ja pikaajalise investeerimise rahastamisallikate stabiilsust. Igakuiselt, pärast eelmise kuu reaalsete tulemuste saamist, koostatakse likviidsusrisi juhtimiseks põhitegevuse rahakäibe prognoos. Ettevõtte juhtkond on seisukohal, et ettevõttel on piisavalt sularahavaru, et nende likviidsust ei kahjustata.

24. BILANSIPÄEVAJÄRGSED SÜNDMUSED

Alates aruandeaasta viimasest päevast kuni käesoleva raamatupidamise aastaaruande allkirjastamise kuupäevani ei ole leidnud aset sündmusi, mis mõjutaks finantstulemusi materiaalselt.

SIA GRUNDFOS PUMPS BALTIC

MANAGEMENT REPORT

The main business goal of SIA Grundfos Pumps Baltic (Registration number 4000350015) is sale of pumps and pumping systems. Starting from 1 July 2010 the Company operates in all Baltic States and has registered branches in the Estonian and Lithuanian market.

In 2014 the Company achieved net sales growth by 0,6% compared to previous year. The sales performance in Baltic States has shown different trends: the main increase is in domestic and commercial building pumping systems, while there is fall in industrial and water utility projects, which is explained by decrease of European Union funds for realization of these projects. Comparing results between countries, growth of sales is standing out in Latvian results, Lithuanian result is with small but stable increase while Estonian results are showing small decrease.

Gross profitability of the Company decreased to 29% in 2014 (2013 - 32%). Comparing to 2013 the total operating costs of the Company in 2014 have decreased by 2%, by reduction of administration costs and loss from currency exchange. However the fall of gross profitability decreased the profit of the Company.

In 2014 the Company continued to invest in fixed assets by investing in information technology equipment.

The Board proposes to distribute part of 2014 profit for the amount of 615,000 EUR in dividends.

The main tasks for 2015 are to increase sales amount in professional sectors – industrial and water utility systems, promote sales of service products, combining with the newest pump technologies in energy efficiency and control equipment. Special attention will be dedicated for professional training of distribution and service partners.

The management of the Company is responsible for these financial statements.

The Annual Report has been prepared in accordance with the Latvian statutory regulations and provides a true and fair view of the Company's financial position.

No subsequent events occurred after the balance sheet date which would require adjustments or disclosure in the financial statements for 2014.

Behalf of the Company on 16 February, 2015 the management report was signed by:

Maurycy Ratajczyk
Chairman of the Board

Ralf Hans Siekmann
Member of the Board

Hans Jørgen Hansen
Member of the Board

The Annual Report was approved in the shareholders meeting on February 20, 2015

The Chairman of the Meeting:  Maurycy Ratajczyk

Translation from Latvian

INDEPENDENT AUDITOR'S REPORT

To the shareholder of SIA Grundfos Pumps Baltic:

Report on the Financial Statements

We have audited the accompanying financial statements of SIA Grundfos Pumps Baltic set out on pages 6 to 24 of the accompanying annual report, which comprise the balance sheet as of 31 December 2014, and the income statement, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the Law of the Republic of Latvia on Annual Reports, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements give a true and fair view of the financial position of SIA Grundfos Pumps Baltic as of 31 December 2014, and its financial performance and its cash flows for the year then ended in accordance with the Law of the Republic of Latvia on Annual Reports.

Report on Other Legal and Regulatory Requirements

We have read the management report for 2014 set out on page 4 of the accompanying annual report for 2014 and have not identified any material inconsistencies between the financial information contained in the management report and the financial statements for 2014.

SIA GRUNDFOS PUMPS BALTIC

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2014

1. GENERAL INFORMATION

Grundfos Pumps Baltic fully owned by Grundfos Holding A/S, legal address: Poul Due Jensen's Vej 7, 8850 Bjerringbro, Denmark was established on 30 June 2000. On 29 September 2010 the Company merged with Grundfos Pumps Eesti OU (Estonia) and Grundfos Pumps UAB (Lithuania).

The main business activities of the Company are wholesale of mechanical pumps and related accessories. The accompanying financial statements include also the financial data of the Company's branches in Estonia and Lithuania for year 2013 and 2014.

2. ACCOUNTING AND VALUATION POLICIES

Basis of preparation

The financial statements have been prepared on historical cost basis. The financial statements are prepared in accordance with the laws of the Republic of Latvia "On Accounting" and "On the Annual Reports".

The accompanying financial statements are presented in the national currency of Latvia, euro (EUR). The accounting policies described after are consistent with those used in the previous accounting period.

Translation of foreign currencies

The accompanying financial statements are presented in the currency of the European Union, the Euro (hereinafter – EUR), which is the Company's functional and presentation currency. Until 1 January 2014, when Latvia joined the Eurozone and the Latvian Lat was replaced by the EUR, the Company carried out its accounting records and prepared its financial statements in the Latvian Lat. Since that date, the Company's accounting records have been carried out in the EUR. The conversion to the EUR was done using the official exchange rate set by the Bank of Latvia – 1 EUR/0.702804 Latvian Lat.

Until 1 January 2014, all transactions denominated in foreign currencies were translated into the Latvian Lat at the Bank of Latvia official rate of exchange prevailing on the transaction day. Starting from 1 January 2014, all transactions denominated in foreign currencies are translated into the EUR at the European Central Bank rate of exchange prevailing on the transaction day. At the balance sheet date monetary assets and liabilities denominated in foreign currencies are translated at the European Central Bank rate of exchange prevailing on 31 December.

The exchange rates established by the European Central Bank are as follows:

	31.12.2014	31.12.2013
	EUR	EUR
1 USD	0.82366	0.72511
1 LTL	0.28962	0,28962

Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies into the EUR are recognised in the statement of profit or loss.

Revenue recognition

Revenue from operating activities consists of bills invoiced during the financial year for goods and services delivered, less value added tax and price decreases, which relate to net turnover.

Revenue from the sale of goods is recognized when all the following conditions are satisfied:

- the Company has transferred the significant risks connected with ownership of goods and rewards to the buyer;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company, and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

SIA GRUNDFOS PUMPS BALTIC

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2014

Fixed assets

Fixed assets are stated at historical cost less accumulated depreciation. Depreciation is computed for all fixed assets based on historical cost and using the straight-line method. The following annual depreciation rates are used:

Office furniture and equipment	10% - 12.5%
Computers	33%
Other fixed assets	20% - 33%

Lease

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of the ownership to the lessee. All other leases are classified as operating leases.

Inventory

Inventories are stated at the lower of cost and net realisable value. Inventory purchase cost comprises the purchase price, import charges and other fees and charges, transport costs as well as other directly attributable costs incurred in bringing the inventories to their present location and condition. The carrying amount of inventories is reduced by charging trade discounts, reductions and similar allowances.

Net realisable value represents the estimated selling price for inventories in the ordinary course of business less all estimated costs of completion and costs necessary to make the sale.

Inventory cost price is determined using the average weighted cost/the first-in, first-out (FIFO) method.

If necessary, an allowance is provided for obsolete, slow moving and defective inventories. The amount of the allowance is recognized in the statement of profit and loss as cost of goods sold.

Trade receivables

Trade receivables are stated at their nominal value as reduced by appropriate allowances for estimated doubtful debts. The Company records allowance for doubtful and bad receivables based on the aging analysis of these accounts. The balance of the allowance is individually assessed to reflect the amount of the debt, the payback time and the client's credit history.

Cash and cash equivalents

Cash represents cash in bank accounts. The statement of cash flows is prepared in accordance with the indirect method to reconcile profit from operating activities with cash flow from operating activities.

Trade payables

Payables balances are stated at nominal value.

Loans

Primary loans are considered in the volume of received funds with deducted expenses related to receipt of the loan.

Borrowing costs

All costs related to loans are expensed in the related period and disclosed in the position "Interest and similar expenses"

The Company as lessee

Payments made under operating leases are charged to the statement of profit or loss on a straight-line basis over the period of the lease.

If the Company is a lessee in a finance lease arrangement, it recognises in the balance sheet the asset as an item of property, plant and equipment and a lease liability measured as the lower of the fair value of the leased property and the present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charge so as to achieve a constant interest rate on the balance of liability outstanding. The interest element of the

SIA GRUNDFOS PUMPS BALTIC

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2014

lease payment is charged to the statement of profit or loss over the lease period. The item of property, plant and equipment acquired under a finance lease is depreciated over the shorter of the useful life of the asset and the lease term, unless it is reasonably certain that the Company will obtain ownership by the end of the lease term.

Provision for holiday pay

The provision is calculated as a total of provisions for all employees, taking into account each employee average daily salary and number of accrued holidays.

Warranty provision

Warranty provision is estimated based on sales, guarantee period and history of guarantee claims.

Related parties

If one person can control the other party or exercise significant influence over the other party in making financial and operating decisions, they are considered to be related parties. Related parties are defined as shareholders, high level management, members of the management board and the supervisory council, their close relatives and companies that directly or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with, the reporting entity.

Corporate income tax

Corporate income tax is calculated based on the taxable income for the period in accordance with Latvian tax legislation. The tax rates stated by Latvian tax legislation are as follows: 2014 – 15%, 2013- 15 %.

Corporate income tax on profit earned in the Republic of Lithuania is calculated and paid in the Republic of Lithuania. Profit or loss earned in Lithuania is eliminated from corporate income tax calculation which is performed according to the Latvian Law on Corporate Income Tax.

Calculated tax on profit distribution is decreased by paid part of tax in Estonia by performing recalculation at the tax rate of 15%.

Deferred corporate income tax

Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. The deferred tax liability is calculated based on the tax rates that are expected to apply when temporary timing differences reverse. The principal temporary timing differences mainly arise from different accounting and tax depreciation rates of fixed assets. Where a deferred tax asset arises, this is only recognized in the financial statements where its recoverability can be estimated with reasonable certainty.

Use of estimates

The legislation of the Republic of Latvia requires that in preparation of the financial statements the management of the Company makes estimates and assumptions that affect the reported amounts of assets, and liabilities and disclosure of off-balance sheet assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The following are the critical judgments and key estimates concerning the future, and other key sources of estimation uncertainty which exist at the reporting date of the financial statements that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities during the next reporting period:

Allowance for doubtful and bad trade receivables

The Company's management evaluates the carrying amounts of trade receivables and assesses their recoverability, making an allowance for doubtful and bad trade receivables, if necessary. The Company's management has evaluated the trade receivables and considers that it is not necessary to make an additional significant allowance as of 31 December 2014.

SIA GRUNDFOS PUMPS BALTIC

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2014

Net realisable value of inventories

The Company's management evaluates the net realisable value of inventories based upon the expected sales prices and selling costs and assesses the physical condition of inventories during the annual stock count. If the net realisable value of inventories is lower than the cost of inventories then an allowance is recorded. The Company's management has evaluated the net realisable value of inventories and considers that it is not necessary to make an additional significant allowance as of 31 December 2014.

Warranty provisions

Warranty provisions are made in the amount of 0.6% from the total cost of goods sold during the reporting period, in accordance with the Company's historical experience. The Company's management considers that it is not necessary to make additional significant warranty provisions as of 31 December 2014.

Useful lives of property, plant and equipment

Useful lives of property, plant and equipment are assessed at each balance sheet date and changed, if necessary, to reflect the Company's management current view on their remaining useful lives in the light of changes in technology, the remaining prospective economic utilisation of the assets and their physical condition.

The carrying amounts of property, plant and equipment

The Company's management reviews the carrying amounts of property, plant and equipment and assesses whenever indications exist that the assets' recoverable amounts are lower than their carrying amounts. The Company's management calculates and records an impairment loss on property, plant and equipment based on the estimates related to the expected future use, planned liquidation or sale of the assets. Taking into consideration the Company's planned level of activities and the estimated market value of the assets, the Company's management considers that no significant adjustments to the carrying values of property, plant and equipment are necessary as of 31 December 2014.

* -cost compensation

**Income from Grundfos Holding A/S for management services in 2013 was EUR 151,223

On 31 December 2013 Company has received following short – term loans from Grundfos Holding A/S:

- LTL 2,000,000 (EUR 580,532) with repayment date 31 January 2014 and fixed interest rate of 1,97% per annum, the interest payment was LTL 5,363 (EUR 1,557);
- LTL 1,500,000 (EUR 435,399) with repayment date 15 January 2014 and fixed interest rate of 1,97% per annum – interest payment was LTL 2,298 (EUR 667).

All loans were collateral free. Loans are repaid and refinanced as of the date of approving these financial statements.

22. COMMITMENTS AND CONTINGENCIES

The Company rents cars on the operating lease terms. Operating lease agreements foresee the following payments:

- up to 1 year EUR 38,918
- from 2 to 4 years EUR 231,375

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2014**

The agreement periods for rented premises by the Company are various and foresee the following payments:

- up to 1 year EUR 40,809
- from 2 to 3 years EUR 2,423

23. FINANCIAL RISK MANAGEMENT

The Company's activities are exposed to a variety of financial risks: foreign currency risk, interest rate risk, credit risk and liquidity risk.

Foreign currency risk

Foreign currency risk is the risk of financial losses incurred by the Company due to adverse fluctuations in foreign currency exchange rates. This risk arises when financial assets denominated in a foreign currency do not match financial liabilities in that currency which results in open currency positions. The Company does not have any material balances of financial assets and liabilities denominated in currencies other than the Euro. Therefore, during the reporting year the Company's exposure to foreign currency risk was not significant.

Interest rate risk

Interest rate risk is the risk of financial losses incurred by the Company due to adverse fluctuations in interest rates. The Company's interest rate risk mainly arises from non-current and current bank borrowings at floating interest rates. This exposes the Company to the risk that interest expenses will increase in a situation when interest rates go up.

Credit risk

Credit risk is the risk of financial losses incurred as a result of default by counterparty on its obligation to the Company. Credit risk mainly arises from cash and short-term deposits with banks, trade receivables and issued non-current and current loans.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to settle its obligations in full as they fall due. Liquidity risk arises when the maturities of financial assets and liabilities do not match. The aim of the Company's liquidity risk management is to maintain sufficient amount of cash and its equivalents, and to insure the availability of funding through sufficient amount of committed bank credit line facilities (Note 12) to settle its obligations at a given date. The Company assesses the repayment term matching of its financial assets and liabilities and the stability of long-term investment sources of funding on a regular basis. An operating cash flow forecast is prepared to manage the liquidity risk on a monthly basis after the actual results of the previous month are available. The Company's management takes the view that the Company will have sufficient cash resources so its liquidity will not be compromised.

24. EVENTS AFTER THE BALANCE SHEET DATE

As of the last day of the reporting year until the date of signing these financial statements there have been no events which would have any material impact on the financial result.
