Independent Auditor's Report

To the Shareholders of Lietuvos draudimas AB

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Lietuvos draudimas AB ("the Company"). The Company's financial statements comprise:

- the statement of financial position as at 31 December 2019,
- the statement of comprehensive income for the year then ended,
- the statement of changes in shareholder's equity for the year then ended,
- the statement of cash flows for the year then ended, and
- notes to the financial statements, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2019, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards, as adopted by the European Union.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the Law on Audit of Financial Statements of the Republic of Lithuania and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Each audit matter and our respective response are described below.

Measurement of claim reserves

The Company's gross of reinsurance outstanding claims reserves as at 31 December 2019 amounted to EUR 110 million (31 December 2018: EUR 90 million). The change in gross of reinsurance outstanding claims reserves in 2019 amounted to EUR 20 million (increase) (2018: 13.6 million).

Reference to the financial statements: "Technical reserves" on page 39 (Summary of significant accounting policies) and Note 7 "Outstanding claim reserves" on page 49 (Notes to the financial statements).

The key audit matter

Gross outstanding claims reserves ("claim reserves") for the Company, as a non-life insurance provider, constitute the most significant element of insurance contract liabilities presented in its statement of financial position. The most significant claim reserves are associated with the obligatory motor third party liability, motor own damage and property portfolios.

The Management Board uses a range of complex and subjective actuarial methods to determine the best-estimate amounts of those reserves as at the reporting date, whether in respect of reported claims (i.e. RBNS), or those not yet reported (i.e. IBNR).

The estimation of the amounts of claim reserves generally involves a significant degree of Management Board's judgment mainly in respect of the assumptions about future events and developments. Relatively insignificant changes in those assumptions may have a material effect on the estimated amounts of claim reserves. The assumptions most subject to estimation uncertainty are those in respect of loss ratios, claim frequency, average claim amounts, court settlements, discount rates, changes in the amount of future annuity payments, regress and the expected payment period.

The complexity of the models applied may give rise to errors as a result of inaccurate and incomplete data inputs or the design or application of the models. Thus the completeness and accuracy of the data underlying the actuarial projections was also an area of our audit focus.

Due to the above factors, we considered measurement of the non-life insurance claim reserves to be our key audit matter.

How the matter was addressed in our audit

Our audit procedures, performed, where applicable, with the assistance of our own actuarial, included, among others:

- Testing the design and implementation of the key controls related to the process of establishing and adjusting outstanding claim reserves.
- Testing the operating effectiveness of the related controls, including the relevant management review controls, accounting and actuarial controls, such as reconciliations of key data underlying the actuarial calculations (such as reports on claims paid and incurred, premiums written and earned, and number of claims), and validation.
- Assessing reasonableness of the actuarial methodologies and assumptions applied by the Company, including in particular the loss ratios, claim frequency and average size of claims, expected trends in court settlements and regress, allowance for future claims inflation (including for annuities), discount rates, expected payment dates and payment period, by reference to the methodologies and assumptions applied by the Company in prior period and the prevailing industry practice, also considering the applicable legal and regulatory requirements and the requirements of the relevant financial reporting standards.
- For all insurance contract portfolios, performing a retrospective analysis of the accuracy and completeness of the Company's gross outstanding claim reserves recognized at the end of prior year, comparing this analysis to the Company's current year's actual experience, and seeking management's explanations for any significant differences.

 For all significant insurance contract portfolios, such as, among others, obligatory motor third party liability, motor own damage and property, developing an independent estimate of the gross outstanding claims liability, comparing our independent estimates to the Company's estimates and seeking Management Board's explanations for any significant differences.

Other Information

The other information comprises the information included in the Company's annual management report, including Corporate Social Responsibility Report, but does not include the financial statements and our auditor's report thereon. Management is responsible for the other information.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

In addition, our responsibility is to consider whether information included in the Company's annual management report for the financial year for which the financial statements are prepared is consistent with the financial statements and whether annual management report has been prepared in compliance with applicable legal requirements. Based on the work carried out in the course of audit of financial statements, in our opinion, in all material respects:

- The information given in the Company's annual management report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- The Company's annual management report has been prepared in accordance with the requirements of the Law on Financial Reporting by Undertakings of the Republic of Lithuania.

We are also required to report on whether the Corporate Social Responsibility Report has been provided to us by the Company. If we identify that Corporate Social Responsibility Report has not been provided, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of the financial statements that give a true and fair view in accordance with International Financial Reporting Standards, as adopted by the European Union, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Under decision of the general shareholders 'meeting we were appointed on 28 March 2013 for the first time to audit the Company's financial statements. Our appointment to audit the Company's financial statements is renewed each two years under decision of the general shareholders 'meeting, and the total uninterrupted period of engagement is 7 years.

We confirm that our audit opinion expressed in the Opinion section of our report is consistent with the additional report presented to the Company and its Audit Committee on 31 March 2020 together with this independent auditor's report.

We confirm that in light of our knowledge and belief, services provided to the Company are consistent with the requirements of the law and regulations and do not comprise non-audit services referred to in Article 5(1) of the Regulation (EU) No 537/2014 of the European Parliament and of the Council.

In addition to the statutory audit services we provided to the Company, there were no services, which would not have been disclosed in the financial statements.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

1. GENERAL INFORMATION

Lietuvos draudimas AB (hereinafter "the Company") is an insurance joint stock company which was registered in Vilnius, the Republic of Lithuania in 1996. The Company offers a wide range of non-life insurance services both to corporate clients and to private individuals.

Name of the Company: Insurance Joint Stock Company LIETUVOS

DRAUDIMAS.

Legal address of the Company:

J. Basanavičiaus str. 12, LT-03600 Vilnius, Lithuania

Phone, fax: (+370) 5266 6612, 1828, (+370) 5231 4138

Tax payer's code in Lithuania: 10051834

State Revenue Service department: Department of large tax payers

Shareholder: POWSZECHNY ZAKŁAD UBEZPIECZEŃ S.A., a

joint-stock company, Poland (100%)

The Company's shares are not listed. The Company belongs to a group whose parent company trades its shares on the Warsaw Stock Exchange and whose main shareholder is the State Treasury of Poland owning more than 34% of the shares.

The Company has a branch in Estonia, by the name Lietuvos Draudimas AB Eesti filiaal. Registration number 12831829, registered address Parnu mnt 141, Tallinn, Estonia.

2. BASIS OF PRESENTATION OF THE FINANCIAL STATEMENTS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below. Consistent accounting principles have been applied to the financial years presented in these financial statements.

2.1 Basis of preparation

2.1.1 Statement of compliance

These financial statements were prepared in accordance with International Financial Reporting Standards (hereinafter "IFRS") as adopted by the European Union (hereinafter "EU"), and Lithuanian legislation applicable to insurance companies.

2.1.2 Functional and presentation currency

All amounts in the financial statements and disclosures are presented in thousands of euro (EUR thousand), unless otherwise stated, which is the Company's functional currency.

2.1.3 Basis of measurement

The financial statements have been prepared on the historical cost basis except for financial statements captions that are stated at fair value: financial investments measured at fair value and investment property.

Reporting year

The reporting period comprises the 12 months from 1 January 2019 to 31 December 2019.

2.1.4 Estimates

The preparation of financial statements in conformity with IFRS as adopted by the EU requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where estimates and judgments are significant to the financial statements are disclosed in Note 3.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

2.2 New standards and interpretations, reclassification of balances in the financial statements

2.2.1 Standards and interpretations effective in the reporting period and adopted by the Company

On 1 January 2019, the Company adopted IFRS 16, which replaces existing guidance on leases, including IAS 17 Leases, IFRIC 4 Determining whether an Arrangement Contains a Lease, SIC-15 Operating Leases – Incentives and SIC-27 Evaluating the Substance of Transactions in the Legal Form of a Lease.

The standard provides a model for recognizing leases between lessees and lessors and disclosing them in the financial statements. The most significant change concerns the Lessee - the standard eliminates the distinction between finance and operating leases and requires the balance sheet to recognize the present value of future lease payments as a liability and to capitalize the right-of-use the leased asset. Short-term and low-value assets leases are exempt from recognition. Lessor accounting remains similar to the existing standard, i. e. lessors continue to subdivide their leases into finance and operating leases. Details in the note 38

A number of new standards are effective for annual periods beginning after 1 January 2019 and earlier application is permitted. However, the Company has not early adopted the new or amended standards in preparing these financial statements. Those, which may be relevant to the Company as well as management's judgements regarding the possible impact of initial application of new and revised standards and interpretations, are set out below. The Company does not plan to adopt these amendments, standards and interpretations early:

- (i) Amendments to IAS 28 Long-term Interests in Associates and Joint Ventures (issued on 12 October 2017. Effective for annual periods beginning on or after 1 January 2019. These amendments are not yet endorsed by the EU.)
- (ii) IFRS 17 Insurance Contracts (Effective for annual periods beginning on or after 1 January 2021; to be applied prospectively. Early application is permitted. This pronouncement is not yet endorsed by the EU.)
- (iii) IFRIC 23 Uncertainty over Income Tax Treatments (Effective for annual periods beginning on or after 1 January 2019. Early application is permitted. This interpretation is not yet endorsed by the EU.)
- (iv) Annual Improvements to IFRS 2015-2017 Cycle (issued o 12 December 2017. Effective for annual periods beginning on or after 1 January 2019. These annual improvements are not yet endorsed by the EU.)

2.2.2 New Standards and Interpretations not yet adopted

(i) Amendments to IAS 28 Long-term Interests in Associates and Joint Ventures (issued on 12 October 2017. Effective for annual periods beginning on or after 1 January 2019. These amendments are not yet endorsed by the EU.)

The amendment clarifies that a venture capital organisation, or a mutual fund, unit trust and similar entities may elect, at initial recognition, to measure investments in an associate or joint venture at fair value through profit or loss separately for each associate or joint venture.

The Company does not expect the Amendments to have an impact on its financial statements when initially applied.

(ii) IFRS 17 Insurance Contracts (Effective for annual periods beginning on or after 1 January 2023; to be applied prospectively. Early application is permitted. This pronouncement is not yet endorsed by the EU.)

IFRS 17 replaces IFRS 4, which was brought in as an interim Standard in 2004. IFRS 4 has given companies dispensation to carry on accounting for insurance contracts using national accounting standards, resulting in a multitude of different approaches.

IFRS 17 solves the comparison problems created by IFRS 4 by requiring all insurance contracts to be accounted for in a consistent manner, benefiting both investors and insurance companies. Insurance obligations will be accounted for using current values, instead of historical cost.

The Company has not yet prepared an analysis of the expected quantitative impact of the new Standard.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

(iii) IFRIC 23 Uncertainty over Income Tax Treatments (Effective for annual periods beginning on or after 1 January 2019. Early application is permitted. This interpretation is not yet endorsed by the EU.)

IFRIC 23 clarifies the accounting for income tax treatments that have yet to be accepted by tax authorities, whilst also aiming to enhance transparency. Under IFRIC 23, the key test is whether it is probable that the tax authority will accept the entity's chosen tax treatment. If it is probable that the tax authorities will accept the uncertain tax treatment, then the tax amounts recorded in the financial statements are consistent with the tax return with no uncertainty reflected in measuring current and deferred taxes. Otherwise, the taxable income (or tax loss), tax bases and unused tax losses shall be determined in a way that better predicts the resolution of the uncertainty, using either the single most likely amount or expected (sum of probability weighted amounts) value. An entity must assume the tax authority will examine the position and will have full knowledge of all the relevant information.

The Company does not expect that the Interpretation, when initially applied, will have material impact on the financial statements as the Company does not have material uncertain tax positions.

(iv) Annual Improvements to IFRS 2015-2017 Cycle (issued o 12 December 2017. Effective for annual periods beginning on or after 1 January 2019. These annual improvements are not yet endorsed by the EU.)

The *Improvements to IFRSs* (2015-2017) contains four amendments to standards. The main changes were to:

- clarify that the entity remeasures its previously held interest in a joint operation when it obtains control
 of the business in accordance with IFRS 3 Business Combinations;
- clarify that the entity does not remeasure its previously held interest in a joint operation when it obtains joint control of the joint operation in accordance with IFRS 11 Joint Arrangements;
- clarify that the entity should always accounts for income tax consequences of dividend payments in profit
 or loss, other comprehensive income or equity according to where the entity originally recognized past
 transactions or events that generated distributable profits; and
- clarify that the entity should exclude from the funds that the entity borrows generally borrowings made specifically for the purpose of obtaining a qualifying asset until substantially all the activities necessary to prepare that asset for its intended use or sale are complete as borrowings made specifically for the purpose of obtaining a qualifying asset should not apply to a borrowing originally made specifically to obtain a qualifying asset if that asset is ready for its intended use or sale.

None of these changes are expected to have a material impact on the financial statements of the Company.

Other standards

The following amended standards are not expected to have a significant impact on the Company's consolidated financial statements:

- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28) (not yet endorsed by EU);
- IFRS 14 Regulatory Deferral Accounts (not yet endorsed by EU).

2.3 Insurance contracts, reinsurance

a) Classification of contracts

Contracts under which the Company accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder are classified as insurance contracts. All contracts concluded are classified as non-life insurance contracts and the Company does not conclude any investment contracts.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

b) Ceded reinsurance

The Company cedes reinsurance in the normal course of business for limiting its net loss potential. Assets, liabilities, income, and expense arising from ceded reinsurance contracts are presented separately from the related assets, liabilities, income and expense from the related insurance contracts because the reinsurance arrangements do not relieve the Company from its direct obligations to its policyholders.

Reinsurance assets include the recoveries due from reinsurance companies in respect of claims paid and the reinsurance share in the technical reserves.

Amounts recoverable from reinsurers are measured on the basis of the reserve for outstanding claims or the settled claims from policies falling within the scope of a reinsurance contract.

Reinsurance commissions include commissions received or receivable from reinsurers based on the reinsurance contracts. Non-life reinsurance commissions are deferred in a manner consistent with the deferral of acquisition costs in non-life insurance.

Unearned reinsurance commissions are included in the statement of financial position under item Accrued expenses and deferred income.

The main obligatory reinsurance contract forms in reinsurance are excess-of-loss treaties. For risks exceeding the limits of obligatory reinsurance treaties or falling outside their scope due to their nature, facultative reinsurance is used.

c) Premiums

Written insurance premiums are insurance premiums for policies, which become effective during the year, irrespective of whether the premium has become due or not. Premiums underwritten are decreased by the premiums cancelled and terminated over the accounting year. Premiums are disclosed gross of commission payable to intermediaries.

The earned portion of premiums written is recognised as revenue. Premiums are recognised as earned on a pro-rata basis over the term of the related policy coverage. The unearned portion of premiums is recognised as an unearned premium technical reserve.

Ceded reinsurance premiums are recognised as an expense in accordance with the pattern of reinsurance service received and the portion of reinsurance premiums attributable to future periods are recognised as assets under the reinsurance part of the unearned premium reserve.

d) Incurred claims

Claims incurred include claims attributable to the reporting year and loss claims handling expenses. Claims paid are decreased by the amount received from salvage or subrogation.

e) Administrative expense

Administrative expense is related to the collection of premiums, management of portfolios, processing of bonuses and discounts and incoming and outgoing reinsurance. They include personnel expenses and depreciation to the extent they are not included in acquisition, claims handling or investing expenses. Expenses are accounted on an accrual basis.

Administrative expenses that are not directly related to a specific type of insurance are divided by type of insurance proportionally to the amount of gross written premiums, net earned premiums and insured objects.

f) Client acquisition costs

Acquisition costs of insurance contracts arise from the conclusion of insurance contracts and consist of direct costs such as commissions and indirect expenses incurred related to the conclusion of contracts.

g) Deferred client acquisition costs (DAC)

Commissions and other acquisition costs that vary with and are related to securing new contracts and renewing existing contracts are capitalised as assets. All other client acquisition costs are recognised as expenses when incurred. Deferred client acquisition cost assets are attributed to profit or loss over the terms of the policies as premium is earned.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

h) Technical reserves

Unearned premium reserve comprises written gross premium related to the period from the reporting date to the expiry of insurance agreement to cover all claims and expenses in accordance with insurance agreements in force.

Unexpired risk reserve is set aside for unexpired risks arising from general insurance contracts where the expected value of claims and expenses attributable to the unexpired periods of policies in force at the reporting period end date exceeds the unearned premium reserve in relation to such policies.

On each reporting date, the Company prepares a liability adequacy test by assessing whether the insurance liabilities recognised during the reporting year for valid policies are adequate.

If the liability adequacy test shows a deficiency in the carrying amount of liabilities, the deficiency is recognised as a loss for the financial year by setting unexpired risk reserve (Note 33).

Outstanding claims reserve is an amount provided at the end of the reporting year in respect of estimated losses incurred but not yet paid. Outstanding claims reserve includes reserves for reported but not settled claims and reserve for incurred but not reported claims. The claims reserve is also created for claims handling expenses that will be necessary in order to settle the claims incurred during the reporting and previous years.

i) Fronting insurance

As a part of regular business operations, the Company insures risks, which it fully cedes to reinsurers, not keeping the insurance risk or taking full risks to itself. Assets, liabilities, as well as income and expenses, which arise from the fronting reinsurance agreements, are presented in statement of financial position of the Company, as full ceding of the insurance risk does not release the Company from the direct liabilities to the insurance policyholder.

2.4 Interest income and expense

Interest income and expense are recognised in the profit and loss for all interest-bearing instruments on an accrual basis using the effective interest rate method. Interest income includes coupons earned on fixed income debt securities, interest on bank deposits and other loans and accrued discounts and premiums on discounted instruments.

2.5 Financial instruments

The Company classifies non-derivative financial assets into the following categories: financial assets measured at fair value through other comprehensive income, financial assets measured at amortised cost and financial assets measured at fair value through profit or loss.

The Company classifies non-derivative financial liabilities into the following categories:

(i) Non-derivative financial assets and financial liabilities - Recognition and derecognition

The Company initially recognises loans and receivables on the date when they are originated. All other financial assets and financial liabilities are initially recognised on the trade date when the entity becomes a party to the contractual provisions of the instrument.

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred, or it neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control over the transferred asset. Any interest in such derecognised financial assets that is created or retained by the Company is recognised as a separate asset or liability. The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to offset the amounts and intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

Measured at amortized cost

These assets are initially measured at fair value plus any directly attributable transaction costs. Assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses.

A financial asset is measured at amortized cost if the following two conditions are met:

- the assets are held within a business model whose objective is to hold assets in order to collect contractual cash flows; and,
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding.

Debt instruments measured at fair value through other comprehensive income

These assets are initially measured at fair value plus any directly attributable transaction costs. These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

Equity investments at fair value through other comprehensive income

For equity investments held for non-trade purpose the Company elects to apply fair-value-through-other-comprehensive income option. These assets are initially measured at fair value plus any directly attributable transaction costs. Subsequently these financial instruments are measured at fair value. Dividends are recognised as income in profit or loss. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

Financial instruments at fair value through profit or loss

These assets are initially measured at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses and foreign currency differences on debt instruments, are recognised in profit or loss.

(ii) Non-derivative financial liabilities – Measurement

Other non-derivative financial liabilities are initially measured at fair value less any directly attributable transaction costs. Subsequent to initial recognition, these liabilities are measured at amortised cost using the effective interest method.

2.6 Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non-performance risk.

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When one is available, the Company measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Company measures assets and long positions at a bid price and liabilities and short positions at an ask price.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Company determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

2.7 Receivables from direct insurance operations

When amounts due from policyholders and intermediaries become overdue, the policy is cancelled and respective amounts are reversed against premiums written. No impairment allowances are made with respect to amounts that have not yet become due and, accordingly, no portion of the premiums is taken to income.

2.8 Intangible assets

Intangible assets are stated at historical cost, less any subsequent accumulated amortisation and accumulated impairment losses, if any. Intangible assets are recognised if it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of asset can be measured reliably. Assets are amortized on a straight-line basis over their estimated useful lives, which are from 1 to 14 years. The useful lives, residual values and amortisation method are reviewed annually to ensure that they are consistent with the expected pattern of economic benefits from items in intangible assets.

2.9 Property and equipment

Assets are controlled and managed by the Company, it is reasonably expected to gain economic benefit from the assets in the future periods, which will be used in the supply of services or for administrative purposes by the Company for more than one-year period, the acquisition cost can be reliably measured and which is higher than EUR 1 000 including VAT.

Assets are stated at acquisition cost less any subsequent accumulated depreciation and accumulated impairment losses, if any. Land is not depreciated.

Calculation of depreciation is started from the month following the month of putting the asset into operation using the straight-line method over the estimated useful life of the tangible asset. Estimated useful lives of key groups of assets are as follows:

Buildings 30–80 years
Vehicles 8 years
Office equipment 3–6 years

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Leasehold improvements are depreciated on a straight-line basis during leasehold period.

Profit or loss from disposal of property and equipment is calculated as the difference between the book value of the property and equipment and income generated from sale, and charged to profit or loss as incurred.

Property and equipment also include assets from operating leases of land and premises. The value of such assets in the financial statements is shown at the present value of all future lease payments.

2.10 Investment property

Investment property constitutes real estate maintained in order to earn lease revenue and/or profit from property value increase, and is accounted for at fair value, and the depreciation thereof is not calculated. The fair value of investment property is reviewed each time financial statements are drawn up, and any changes thereof are reflected in the profit and loss.

Any repair works for the investment property reflected in the financial statements at their fair value are recognised as costs of the period during which they were incurred. Investment property is shown at fair value, based on periodic valuations.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

2.11 Foreign currency revaluation

Foreign currency transactions are translated into euro applying the euro foreign exchange reference rate published by the European Central Bank at the transaction date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at the reporting date foreign exchange reference rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss of the respective period.

| | 31.12.2019 | 31.12.2018 |
|-------|------------|------------|
| 1 USD | EUR 0.8937 | EUR 0.8733 |
| 1 GBP | EUR 1.1736 | EUR 1.1179 |
| 1 PLN | EUR 0.2349 | EUR 0.2324 |

2.12 Corporate income tax

Corporate income tax expense represents the sum of the tax currently payable and deferred income tax change.

Income tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current income tax is calculated using tax rates that have been enacted or substantively enacted by the date of the statement of financial position. Income tax rate applied for the Company was 15% in 2019 (15% in 2018).

<u>Deferred income tax</u>

Deferred income tax is recognised on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and are accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from goodwill (or negative goodwill) or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction, that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax is accounted for in profit or loss, except when it relates to items accounted for directly in equity, in which case the deferred tax is also dealt with in equity. Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

2.13 Cash and cash equivalents

Cash and cash equivalents include deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

2.14 Impairment

Impairment of property and equipment and intangible assets

At each reporting date, the Company reviews the carrying amounts of its property and equipment and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation cannot be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified. Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately as income, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

Impairment of financial assets

Impairment of financial assets is recognised based on expected credit loss (ECL) which could be suffered due to counterparty default. Expected credit losses model is applied on financial assets measured at fair value through other comprehensive income (except equity instruments) and on financial instruments measured at amortised cost. It is not applicable on financial instruments measured at fair value through profit or loss as well as on equity instruments measured at fair value through other comprehensive income.

Terms and definitions:

Expected Credit Loss (ECL) – the probable decrease in future cash-flows due to default event or impairment of receivables;

Probability of default (PD) – probability that over particular time liabilities to the Company will not be fulfilled. *Loss Given Default (LGD)* – share of financial asset expected to lose in the case of default event;

Exposure at Default (EAD) – the amount which is exposed to default risk and for which expected credit losses are calculated;

Lifetime ECL – the expected credit losses from all possible default events over the expected life of the financial instrument:

12-month ECL – the part of the credit loss for the period of validity, resulting from loss events likely to occur within the next 12 months from the assessment date;

Recovery rate – is the extent to which defaulted debt can be recovered.

ECL on debt instruments measured at FVOCI

ECL on debt instruments is calculated based on probability of counterparty default (PD) and expected loss given default (LGD). PDs are determined by using statistics (default history of issuers with the same rating) published by major credit rating agencies. Certain probabilities of default are calculated and assigned to each financial instrument according credit rating of issuer. LGDs evaluation is also based on historical recovery rates published by credit agencies.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

The Company applies 12-month ECL on debt instruments. Except if credit risk of a financial asset at the reporting date increased significantly compared to credit risk at date of initial recognition the Company applies Life-time ECL. Credit risk is determined based on external credit rating. Company considers that a financial asset's credit risk has not increased significantly if the asset has low credit risk (credit rating is under investment-grade class) at the reporting date.

ECL on receivable amounts

Life-time ECL is applied on amounts receivable. ECL is calculated based on statistics of debts aging and recoverability of debts of certain aging group (step of one-month) throughout last 15 months. ECL calculations on receivables from intermediaries are performed using intermediaries creditworthiness and debts aging data. Also, indicators about possible difficulties of debtors are considered. That includes both publicly available and through Company's internal channels gathered information. Default event is considered to be occurred when receivable amount becomes 90 days past due.

Presentation in financial statements

For financial assets measured at amortised cost the loss allowance is deducted from the gross carrying amount of the assets. For debt investments measured at FVOCI the loss allowance is recognised in other comprehensive income and does not reduce the carrying amount of the financial asset in the statement of financial position. The impairment on receivables is recognised in profit or loss for the period.

3. USE OF JUDGEMENTS AND ESTIMATES

Management makes judgments, estimates and assumptions that are applied in the process of preparation of the financial statements and affect the reported amounts of assets and liabilities, income and expenses. Although these estimates are based on management's best knowledge of current events and actions, the actual results ultimately may differ from those estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to the accounting estimates are recognised in the period, in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Outstanding claims reserve is one of the main Company's evaluations which estimate the ultimate liability arising from claims made under insurance contracts.

The reserve for reported but not settled claims (RBNS) is calculated automatically when entering preliminary case settlement amount into the insurance system set by claims specialists as at the accounting date. For newly reported cases initial case estimates derived by actuaries from claims data are used, which are then updated by claims specialists based on additional information received.

The reserve for incurred but not reported claims (IBNR) is calculated by lines of business using Bornhuetter-Ferguson, Loss Ratio and Average Pay-out methods. Loss Ratio for Bornhuetter-Ferguson method is derived using frequency, severity and average premiums, also taking seasonality effect into account. It means that the method is supported by Chain-Ladder and Average Pay-out or Loss Ratio methods.

IBNR for most reserving classes in Lithuania and Estonia is calculated using Bornhuetter-Ferguson method due to sufficient claims history and stable development pattern. IBNR for other reserving classes is calculated using simplified Bornhuetter-Ferguson method where development pattern is assumed. For remaining reserving classes, due to insufficient claims data or unstable development pattern, Loss Ratio method is used. Also, IBNR is formed for specific liabilities arising from particular situations such as pain and suffering claims periodic payments, indexation of net retention and reopening claims.

Claims handling provision is calculated as a percentage from outstanding claims assuming that on average half of reported, but not settled claims are not yet handled. Coefficients for claims handling reserve are selected analysing historical ratios of claims handling expenses.

Reserves for recourse outstanding and recourse asset are calculated deriving historic recovery percentages by accident quarters and applying them on outstanding claims amounts.

Lietuvos draudimas AB Company's code 110051834, J. Basanavičiaus st. 12, Vilnius

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

Other areas where assumptions and estimation uncertainties are involved are impairment, evaluation of deferred acquisition costs, investment properties. Further information about the assumptions made on those areas is included in the following notes:

Impairment: Notes 2.14; 12.

• Investment property: Notes 2.1.3, 2.10; 18

Deferred acquisition costs: Notes 8, 33.

^{*-} since 1 January 2019 the Company started to apply IFRS 16 standard rules, i. e. to capitalize right-of-use assets. The biggest part of such assets as at 31 December 2019 is the rent of premises – EUR 1 728 thousand (Lithuania – EUR 592 thousand, Estonia – EUR 1 136 thousand), the remaining part comes from land lease in Lithuania – EUR 259 thousand. All assets are premises and land right-of-use assets, which the Company uses for insurance business purposes. Details of the IFRS 16 implementation are disclosed in Note 38.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

18. INVESTMENT PROPERTY

| Net book value at 31 December 2017 | 1 422 |
|------------------------------------|-------|
| Change in fair value in 2018 | 78 |
| Net book value at 31 December 2018 | 1 500 |
| Change in fair value in 2019 | |
| Net book value at 31 December 2019 | 1 500 |

Investment property comprises commercial property that is leased to a third party. The fair value of investment property is reviewed at each reporting date, and any changes are reflected in profit or loss.

The Company assesses the fair value of investment property based on the opinion of independent property valuation agency that holds a recognised and relevant qualification. Fair value of property is determined using income approach. Fair value inputs are categorised as Level 3 in the fair value hierarchy defined in IFRS 13.

19. FINANCIAL INVESTMENTS

| Total financial investments: | 257 091 | 263 055 | 229 949 | 232 978 |

Financial investments at FVOCI in total of EUR 239 526 thousand at fair value are quoted. In accordance with IFRS 13 definitions, based on inputs used in the valuation techniques, fair values of quoted assets are categorised into the fair value hierarchy Level 1: unadjusted quoted prices in active markets for identical assets. As at 31 December 2019, the Company did not have unquoted financial investments measured at EVOCI

Financial investments at FVTPL in total of EUR 1 600 thousand at fair value are quoted (Level 1 in the fair value hierarchy). Assets amounting to EUR 21 928 thousand are categorised as Level 2 in the fair value hierarchy.

No movements between levels of the fair value hierarchy occurred throughout the financial year.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

Changes in ECL of financial instruments are presented below:

| Debt instruments measured at FVOCI | 12-month ECL | Life-time ECL not credit- impaired | Life-time ECL credit- impaired | Total |
|------------------------------------|-----------------|--|--------------------------------------|-------|
| As at 31 December 2018 | (68) | - | - | (68) |
| ECL measurements | 8 | - | - | 8 |
| New assets acquired | (22) | - | - | (22) |
| Financial assets derecognised | 3 | - | - | 3 |
| As at 31 December 2019 | (79) | | _ | (79) |

Equity instruments measured at FVOCI and financial assets measured at FVTPL are not subject to the ECL model.

20. OTHER COMPREHENSIVE INCOME (OCI)

| Items that are or may be reclassified to profit or loss: | 2019 | 2018 |
|--|-------------|-----------------|
| Revaluation of debt securities measured at fair value through OCI Realisation result reclassified to profit or loss | 1 517 41 | (1 363) (27) |
| Items that will not be reclassified to profit or loss: | | |
| Revaluation of equity instruments measured at fair value through OCI | 265 | (67) |
| | 1 823 | (1 457) |
| Amounts are presented net of deferred income tax. | | |

21. RECEIVABLES FROM DIRECT INSURANCE OPERATIONS

| | 31.12.2019 | 31.12.2018 |
|---|------------|------------|
| Gross receivables from direct insurance operations | 54 830 | 50 880 |
| Impairment for receivables from direct insurance operations | (561) | (551) |
| | 54 269 | 50 329 |

The ageing of receivables from direct insurance operations at the reporting date was as follows:

| | Gross 31.12.2019 | Life-time ECL 31.12.2019 | Gross 31.12.2018 | Impairment 31.12.2018 |
|----------------------------|---------------------|-----------------------------|---------------------|--------------------------|
| Current | 53 045 | (201) | 47 583 | (180) |
| Past due 0-30 days | 1 374 | (61) | 2 667 | (52) |
| Past due 31-60 days | 100 | (8) | 269 | (7) |
| Past due more than 60 days | 311 | (291) | 361 | (312) |
| | 54 830 | (561) | 50 880 | (551) |

The management believes that the net amounts that are past due by more than 30 days are still collectible in full, based on historic payment behaviour and analysis of customer credit risk.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

The movement in the allowance for impairment in respect of receivables from direct insurance operations during the year was as follows:

| As at 31 December 2017 | | 609 |
|--|------------|------------|
| Additional allowances | | 583 |
| Recovered debts | | (497) |
| Written-off debts | | (144) |
| As at 31 December 2018 | | 551 |
| ECL measurements | | 597 |
| Debts recovered | | (407) |
| Debts written-off | | (180) |
| As at 31 December 2019 | | 561 |
| 22. REINSURANCE RECEIVABLES | | |
| | 31.12.2019 | 31.12.2018 |
| Gross receivables from reinsurance operations | 3 433 | 2 938 |

| 23. OTHER ACCRUED INCOME AND DEFERRED EXPENSES | | |
| | 31.12.2019 | 31.12.2018 |
| Deferred Motor Bureau fee | 871 | 904 |
| Deferred information system maintenance fees | 537 | 738 |
| Other deferred expenses | 576 | 452 |
| | 1 984 | 2 094 |
| 24. OTHER RECEIVABLES | | |
| | 31.12.2019 | 31.12.2018 |
| Receivables for subrogation transactions | 1 768 | 2 109 |
| Receivables from the Motor Bureau | 671 | 906 |
| Other receivables | 564 | 250 |
| Receivables from prepayments | 365 | 276 |
| Impairment of other receivables | (55) | (80) |
| Total other receivables | 3 313 | 3 461 |
| | | |

Other receivables are due within 12 months from the Statement of Financial Position date and carry no interest.

The movement in the allowance for impairment in respect of other receivables during the year was as follows:

| As at 31 December 2017 | 256 |
|------------------------|-------|
| ECL measurements | 12 |
| Debts recovered | (12) |
| Debts written-off | (176) |
| As at 31 December 2018 | 80 |
| ECL measurements | 12 |
| Debts recovered | (15) |
| Debts written-off | (22) |
| As at 31 December 2019 | 55 |

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

25. CASH AND CASH EQUIVALENTS

| | 31.12.2019 | 31.12.2018 |
|---------------|------------|------------|
| Cash in banks | 7 685 | 5 567 |
| | 7 685 | 5 567 |

In 2019 and 2018, the Company did not have any term deposits in credit institutions.

26. SHARE CAPITAL AND RESERVES

a) Issued and fully paid share capital

The total authorised number of ordinary shares is 805 620 (as at 31 December 2018 the number of ordinary shares was the same). The nominal value of one share as at 31 December 2019 is EUR 14.48 (as at 31 December 2018, the nominal value of one share was the same). All issued shares are fully paid. The share capital of the Company as at 31 December 2019, is EUR 11 665 thousand (as at 31 December 2018 – EUR 11 665 thousand).

The Company's shares are not listed.

b) The shareholder

As at 31 December 2019 and as at 31 December 2018, the shareholder of the Company with 100% shares was POWSZECHNY ZAKŁAD UBEZPIECZEŃ S.A., a joint-stock company.

c) Share premium

According to the share issue rules, a share premium was set in addition to the nominal value of the shares.

d) Reserve capital and other reserves

Reserves include legal reserve and revaluation reserve for financial instruments measured at fair value through OCI. The Company's legal reserve as at 31 December 2019 was the same as at 31 December 2018 and amounted to EUR 2 333 thousand. Legal reserve was formed in full capacity and cannot be distributed.

The revaluation reserve increased throughout the year from EUR 4 210 thousand at 31 December 2018 to EUR 5 992 thousand at 31 December 2019.

e) Profit distribution as dividends

In accordance with the Company's Dividend policy, the amount of dividends determined as available for distribution for the year ended 31 December 2019 is EUR 6.8 million. However, considering uncertainties related with COVID-19 pandemic development and its economic impact, and taking into account EIOPA statement No. 20-137 "EIOPA statement on actions to mitigate the impact of Coronavirus/COVID-19 on the EU insurance sector" published on 17 March 2020, the Management Board of the Company recommends to distribute as dividends only 50% of the above mentioned amount, i.e. EUR 3.4 million, and the remainder of the net profit of 2019 to be transferred to the Company's Retained earnings. The final amount of dividends is subject to proposal of the Supervisory Board and the decision of the General Shareholders' Meeting.

31. RELATED PARTIES TRANSACTIONS

Related parties represent both legal entities and private individuals related to the Company in accordance with the following rules:

- a) A person or a close member of that person's family is related to the Company if that person:
 - has control or joint control over the Company;
 - ii) has significant influence over the Company; or
 - iii) is a member of the key management personnel of the Company or of a parent of the Company.
- b) An entity is related to the Company if any of the following conditions applies:
 - i) The entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
 - ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
 - iii) Both entities are joint ventures of the same third party.
 - iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
 - v) The entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company. If the Company is itself such a plan, the sponsoring employers are also related to the Company.
 - vi) The entity is controlled, or jointly controlled by a person identified in (a).
 - vii) A person identified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
 - viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Company or to the parent of the Company.

32. CONTINGENT LIABILITIES AND COMMITMENTS

a) General claims

In the normal course of business, the Company constantly receives requests for claim payments. Such claims have been reviewed by the Company's management who is of the opinion that no material unprovided losses will be incurred.

b) Litigation

The Company, like other insurers, is subject to litigation in the normal course of its business. As at 31 December 2019 there were EUR 2 956 thousand (31 December 2018: EUR 2 639 thousand) where the Company is defendant. The management is of the opinion that no material unrecognised losses will be incurred.

c) Capital commitments

The Company does not have significant capital commitments as at 31 December 2019.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

d) Operating lease

The Company does not have any non-cancellable operating leases as at 31 December 2019, other than the rent of premises that usually can be terminated at terms agreed in lease contracts. Total minimal commitment for rent payments as at 31 December 2019 amounts to EUR 131 thousand (EUR 128 thousand to be paid in one year and EUR 3 thousand to be paid later than in one year but not later than in five years). Total minimal commitment for rent payments as at 31 December 2018 amounted to EUR 941 thousand, including EUR 830 thousand which as at 1 January 2019 was recognised as right-of-use assets minimum liability (EUR 330 thousand to be paid in one year and EUR 500 thousand to be paid later than in one year but not later than in five years) and EUR 111 thousand liability of rent payments to be paid in one year.

e) Tax contingencies

The local tax authorities have the power to examine the tax position of the Company for the previous five years. The Company's management believes that the outcome of tax authority's examination will not result in a material impact on the Company's results and operations or its financial position.

33. INSURANCE RISK MANAGEMENT

The Company's activity is a conclusion of contracts between the insured and the Insurer by which the Insured (policyholder) transfer the risk to the Insurer (the Company). An insurance contract is one that contains an agreement by the Insurer to provide, in exchange for insurance premiums, benefits to a beneficiary of the contract upon occurrence of specified uncertain future events affecting the life or property of the insured party (the Insured). This section summarises these risks coming from that process and the way the Company manages them.

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By calculating the amount and type of risk to insure, the distribution of possible losses should be evaluated and understood. The quantity of losses within a specific period is the frequency of loss. In addition to loss frequency, the insurance company should be also concerned with the severity of losses. Loss severity is typically the amount that an insurer pays out for a benefit or a claim. These principal risks are due to the claims paid varying in size, number, or timing of benefit payments and actual calculation premiums amount covering possible indemnities paid. For a portfolio of insurance contracts where the theory of probability is applied to pricing and reserving, the principal risk that the Company faces under its insurance contracts is that the actual claims payments will exceed the carrying amount of the insurance liabilities.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected by a change in any subset of the portfolio. The Company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

The frequency and severity of claims can be affected by several factors. The most significant are the increasing level of indemnities paid for the damage suffered, and the increase in the number of claim cases. Estimated inflation is also a significant factor due to increased increment rate of inflation.

The Company manages these risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling. It is achieved by managing different type of insurance contracts aggregated into insurance portfolios grouped by similar lines of business or similar type of insurance contracts.

The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk, industry and geography.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

Types of significant insurance contracts

Motor third party liability insurance

It is a compulsory insurance type, the policy conditions and indemnification rules of which are prescribed by the Motor Third Party Liability Insurance Act and other related legislation.

Most of motor third party liability insurance indemnities are made up of indemnities for property damage and lump sum personal injuries, mostly medical treatment costs and temporary incapacity for work benefits. However, long-term indemnities may also be possible, such as pensions and permanent incapacity for work benefits which may be paid out over decades.

Accident insurance

The accident insurance is a money compensation for the facts of bodily injury where one type of contracts indemnifies death, permanent incapacity for work or trauma arising from an accident. It includes some insurance cover of costs for medical treatment as well as medical expenses, caused by accident. In addition, it is possible to get daily allowances for the time spent in a hospital or temporary disability. Typical losses are generally small and they are indemnified as lump sums. Death events rarely occur on the basis of accident insurance contracts.

Travel insurance

The travel insurance indemnifies for the medical treatment costs incurred during a trip abroad if such costs are caused by an illness or an accident started during the trip, repatriation, if needed. As an additional cover, the cover loss of a baggage, insurance against trip cancellations, travel interruptions and delays as well as General Third-Party Liability (GTPL) or personal accident coverage could be included. The indemnity limit for the medical treatment and repatriation costs of passenger is usually limited to EUR 100 thousand. A larger risk is related to potential natural disasters in holiday areas or transport crashes, where the number of the injured is large.

Typical losses are generally small. The amount of an indemnity depends on the location of the loss occurrence and the number of claims depends on the season.

Motor own damage insurance

The insurance indemnifies for losses which arise from damage to the vehicle, its destruction, theft or robbery. Several additional insurance covers may also be purchased (like possibility to repair the vehicle with new spare-parts for vehicles up to certain year age, possibility to choose auto repair workshop, cover for additional equipment, cover for passengers). Insurance premiums are determined individually for each customer based on both customer as well as vehicle-based risk criteria. Product package includes road assistance and a replacement car.

Property insurance, business interruption insurance and building risks insurance

Property insurance covers losses arisen because of fire, weather, leakage of liquid or steam, explosion, malicious acts by third parties (robbery, burglary), collision. Client has an option to insure by All Risks cover for extra premium. There is a possibility for individuals (private persons) to insure their contents (property) and civil third-party liability in addition to private property insurance.

Business interruption insurance covers lost business profits and fixed costs incurred, which arise as a result of any risk covered by property insurance of the Insured.

The largest losses arise from fire risks, which in turn give rise to indemnification for business interruptions. The loss is particularly large if the property (buildings and structures with movables in them) insured to a full extent is destroyed and this leads to a business interruption indemnity until the production object is again put in operation.

Lietuvos draudimas AB Company's code 110051834, J. Basanavičiaus st. 12, Vilnius

NOTES TO THE FINANCIAL STATEMENTS

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

The most frequent events for private property are from all Risks cover, water leakage, theft, fire and weather losses (storm, snowing and flood). The largest losses usually are because of fire.

Livestock insurance also includes risks related to the injuries resulting in death of animals. Most risky part of the cover is against very dangerous epizootic diseases.

Largest losses resulting from property type damages are managed by concluding appropriate reinsurance contracts depending on created realistic risk scenarios based on accepted exposure under insurance contracts.

General liability insurance

This insurance provides coverage for bodily injury and property damage caused to a third party by an insured person, due to its activity or inactivity or by an insured company, due to its operations or products. In respect of property damages, only direct losses are covered, but in respect of bodily injuries, direct as well as consequential loses are covered, such as unearned income because of temporary or permanent inability and allowances for dependents.

Reinsurance contract assets

The benefits to which the Company is entitled under its reinsurance contracts held are recognised as reinsurance assets.

These assets consist of short-term balances due from reinsurers as well as longer term receivables that are dependent on the expected claims and benefits arising under the related reinsured insurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as an expense when due.

The Company assesses its reinsurance assets for impairment on a regular basis. If there is objective evidence that the reinsurance asset is impaired, the Company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises that impairment loss in profit or loss.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

Sensitivity to insurance risk

Based on the fact that the Company provides non-life insurance services, only the accounting estimates and assumptions for reserve for incurred but not reported claims, as disclosed in Note 3, are assessed by the Company to have a material effect on the timing and uncertainty of the Company's future cash flows. The Company performs sensitivity testing of IBNR claims reserves.

Sensitivity analysis for claims reserves at 31.12.2019:

| Motor vehicle third | Impact if loss ratio 1 percent points higher than used in IBNR estimates | Impact if loss ratio 1 percent points lower than used in IBNR estimates | Impact if claims handling expenses 1% higher than used in reserve estimates | Impact if claims handling expenses 1% lower than used in reserve estimates |

(All amounts in thousands of euro unless otherwise stated)

Reinsurance coverage

The reinsurance arrangements include excess and catastrophe coverage. The effect of such reinsurance arrangements is that the Company for each insurance risk has following own retention:

Maximum own retention:

| | 2019 | 2018 |
|--|-------|-------|
| Personal accident & Travel medical expense | 102 | 96 |
| Motor own damage | 150 | 150 |
| Motor vehicle third party liability | 400 | 400 |
| Cargo insurance | 200 | 200 |
| Hull, CMR Property | 200 | 200 |
| Property insurance | 1 163 | 1 199 |
| General TPL insurance | 349 | 360 |
| Debt securities and guarantees | 465 | 240 |

Liability adequacy test

At each reporting date, liability adequacy tests are performed to ensure the adequacy of contract premiums to liabilities net of estimated claims paid, related deferred acquisition costs (DAC) assets, administrative, claim handling expenses and bonus and rebates. In performing these tests, current best estimates of future contractual cash flows are used. If the liability adequacy test shows a deficiency in the carrying amount of liabilities, the deficiency is recognised as a loss for the financial year by setting unexpired risk reserve.

Unexpired risk reserve as at 31 December 2019 is EUR 3.1 million (31 December 2018: EUR 1.9 million).

34. FINANCIAL RISK MANAGEMENT

Risk management framework:

The Company's management has overall responsibility for the establishment and oversight of the Company's risk management framework. The management monitors the Company's risk management policies, which are established to identify and analyse and manage the risks faced by the Company. Policies aim to set appropriate risk limits and controls, and to continuously monitor risk levels and adherence to limits. Risk management policies and procedures are reviewed regularly to reflect changes in market conditions, products offered and emerging best practice.

The operations of the Company and investment management activities in particular expose it to a variety of financial risks, including credit risk, liquidity risks and market risks, which include interest rate risks, currency risks, as well as fair value risks. The Company's management seeks to minimise potential adverse effects of financial risks on the financial performance of the Company by placing limits on the level of exposure that can be taken.

34.1 Credit risk

The Company takes an exposure to credit risk which is the risk that a counterparty will be unable to pay amounts in full when due. The Company structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one issuer of securities, debtor, borrower, or group of the above. Such risks are monitored on a revolving basis and subject to an annual or more frequent review. Actual exposures against limits are monitored regularly.

Exposure to credit risk is managed through regular analysis of the ability of issuers, borrowers, and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate.

34.2 Liquidity risk

The Company is exposed to regular calls on its available cash resources from claims settlements. The Management sets the minimum level of cash resources, which must be available to meet its liabilities.

There has been the following distinction of financial assets, financial liabilities and claim reserves by their remaining maturities as at the reporting date:

| Year 2019 | Up to 12 months | 1 to 5 years | Over 5 years | Total |
|--|-----------------|--------------|-----------------|-----------|

| ======================================= | | | | |

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

34.3 Market risk

The Company takes an exposure to market risks, which include interest rate risks, currency risks, as well as fair value risks. Market risks arise from open positions in interest rate, share price and currency instruments, all of which are exposed to general and specific market movements. The management sets limit on the value of risk that may be accepted, which is monitored regularly.

a) Exposure to interest rate risk

The Company's exposure to interest rate risk is limited as significant part of liabilities are not bearing interest and the dominant part of interest bearing financial instruments have fixed interest rates. Maturity dates are materially equal to reassessment dates on all interest-bearing assets and liabilities. Weighted average effective interest rates, as applicable, for the interest bearing financial instruments, excluding insurance contracts, were as follows:

| | 2019 | 2018 |
|------------------------------------|-------|---------|
| Corporate debt securities | 2.08% | 2.21% |
| Government debt securities | 1.00% | 1.22% |
| Collective investment undertakings | 0.21% | (1.55%) |

Risk measurement is regularly analysed by applying back tests and comparing revaluation profit / (loss) from positions with the respective potential risk.

Change in investment value and effect on net result due to market interest rate changes was as follows:

| | | 201 | 2018 |
|---|--------------------|---------|---------|
| Market interest rate and impact on fair value | +0.5 percent point | (5 024) | (4 296) |
| · | -0.5 percent point | 5 024 | 4 296 |

b) Fair value determination

Financial assets and financial liabilities other than those reflected at their fair value (see Notes 18, 19) are receivables, term deposits with credit institutions and cash and cash equivalents.

Insurance, reinsurance and other financial debtors and financial liabilities have their remaining maturities of less than one year and carry no interest, thus, their fair value is deemed not to materially differ from their carrying amounts.

Term deposits with credit institutions and cash and cash equivalents are short-term financial instruments that have their remaining maturities of less than one year and that carry no or little interest, thus, their fair value is deemed not to materially differ from their carrying amounts.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

c) Currency risk

The Company is not exposed to significant currency risk as the reinsurance coverage is provided in, and other transactions are, as a rule, denominated in euros. Management of the Company seeks to limit currency risk through an investment portfolio created in respective currencies in the amount equal to respective amounts of outstanding claims reserves and other liabilities.

Split of financial assets, financial liabilities and claim reserves by currencies as at the reporting:

| Year 2019 | EUR | Other | Total |
|---|---|---|---|
| Financial assets and reinsurers' share of outstanding claims | | | |
| reserves | | | |
| Financial assets at fair value through other comprehensive income | 239 526 | - | 239 526 |

37. RECLASSIFICATION OF COMPARATIVE INFORMATION IN THE STATEMENT OF COMPREHENSIVE INCOME

Comparative information in the particular items of the statement of comprehensive income for prior year was reclassified in order to keep comparability with the current year's financial statements.

Starting from 1 January 2019 the allocation of expenses between items of the statement of comprehensive income has been changed in order to unify the rules for the disclosures of expenses in the financial statements for the Group of companies to which the Company belongs.

| Items of the Statement of comprehensive income | 31.12.2018 (before reclassification) | Reclassification effect | 31.12.2018 (after reclassification) |
|--|--------------------------------------|-------------------------|-------------------------------------|
| Claims settlement expense | (10 622) | (37) | (10 659) |

| Other income and expense | 269 | (263) | 6 |
| Profit / (loss) for the year | 17 547 | - | 17 547 |

38. IMPLEMENTATION OF IFRS 16

As of 1 January 2019, the Company has applied IFRS 16 *Leases* and has recognized new assets and liabilities arising from operating leases of its land and premises. The nature of the costs relating to these leases has changed as the Company recognizes the depreciation of right-of-use assets and the interest expense on lease liabilities.

Previously, the Company recognized operating lease expenses on a straight-line basis over the lease term and recognized assets and liabilities only to the extent of the difference between the actual lease payments and the recognized expenses.

The Company uses a modified retrospective approach to IFRS 16, comparative information is not restated. Transactions that were treated as operating leases in prior periods under IAS 17 have been measured, in accordance with IFRS 16, at the discounted value of the remaining lease payments in the Company's statement of financial position.

This note in the financial statements discloses the principles of recognizing a right-of-use asset and the impact of the adoption of IFRS 16 on the statement of comprehensive income, financial position and cash flows.

Recognition of right-of-use assets

The Company applies the following criteria for the recognition of a right-of-use asset.

A contract is a lease if lessee has the right to control the use of an identified assets for a period of time in exchange for consideration (including to obtain substantially all of the economic benefits from the use).

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

An identified lease asset is:

- explicitly specified in a contract or implicitly specified,
- physically distinct,
- there is no substantial right to substitute the asset.

At inception of a contract, the Company assesses whether the contract is a lease. To do this, the Company should assess whether contract meets all conditions mentioned:

- a right-of-use asset has been identified;
- · consideration for using the asset has been set;
- contract conveys the right to control the use of the asset and the right to obtain all of the economic benefits from use of the assets for a period of time.

To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Company shall assess whether, throughout the period of use, the customer has both of the following:

- the right to obtain substantially all of the economic benefits from use of the identified asset and
- the right to direct the use of the identified asset.

When assessing the right to obtain substantially all of the economic benefits from use of an asset, the Company shall consider the economic benefits that result from use of the asset within the conditions defined in the contract, both directly and indirectly, such as by using, holding or sub-leasing the asset.

If the rights to obtain economic benefits are limited, the Company should assess whether other party has the right to obtain the economic benefits from use of an asset and whether they are material.

The economic benefits from use of an asset include:

- its primary output and by-products (including potential cash flows derived from these items), and
- other economic benefits from using the asset that could be realized from a commercial transaction with a third party.

The Company has the right to direct the use of an identified asset throughout the period of use only if either:

- the Company has the right to direct how and for what purpose the asset is used throughout the period of use; or
- the relevant decisions about how and for what purpose the asset is used are predetermined and:
 - the Company has the right to operate the asset (or to direct others to operate the asset in a manner that it determines) throughout the period of use, without the supplier having the right to change those operating instructions; or
 - the Company designed the asset (or specific aspects of the asset) in a way that predetermines how and for what purpose the asset will be used throughout the period of use.

Lease when Company is a lessee

In assessing the lease contract, the Company shall account for each lease component within the contract as a lease separately from non-lease components of the contract.

Value of lease and non-lease components shall be determined on the basis of the contract conditions or additional information delivered by a lessor. If information is not included in the contract or is not given by lessor, the Company should estimate the value based on information available.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

The lease term begins at the commencement date of use of an asset and contains the period for which the Company has the right to use together with both:

- periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and
- periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option.

The Company reassess the lease term upon the occurrence of either a significant event or a significant change in circumstances that is within the control of the Company and affects whether the Company is reasonably certain to exercise an option not previously included in its determination of the lease term, or not to exercise an option previously included in its determination of the lease term.

The Company shall revise the lease term if there is a change in the non-cancellable period of a lease or reassess lease term in case of change of contract, if the change is not recognized as separate lease.

Lease term is non-cancellable if a lessee and lessor has the right to terminate the lease without permission from the other party with no more than an insignificant penalty.

In order to measure the initial right-of-use asset value the Company should identify and collect the following information concerning, in particular:

- lease payments;
- fixed and variable lease payments identification;
- frequency and means of index:
- translation of rent in foreign currency;
- timing of payments (advanced or in arrears);
- lease term:
- discount rate or in case of lack the defined rate in the contract lessee's incremental borrowing rate;
- commencement date.

At the commencement date, a lessee shall measure the right-of-use asset at cost.

The cost of the right-of-use asset shall comprise:

- the amount of the initial measurement of the lease liability;
- any lease payments made at or before the commencement date, less any lease incentives received;
- anv initial direct costs incurred by the lessee; and
- an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

- fixed payments, including in-substance fixed payments, less any lease incentives receivable;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the lessee under residual value guarantees;
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

A lessee shall measure the right-of-use asset at cost determined at the commencement date:

- less any accumulated depreciation and any accumulated impairment losses; and
- adjusted for any re-measurement of the lease liability reflecting a lease modification that is not accounted for as a separate lease.

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

A lessee shall measure the lease liability by:

- increasing the carrying amount to reflect interest on the lease liability;
- reducing the carrying amount to reflect the lease payments made; and
- re-measuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments.

When the contract lacks interest rate implicit in the lease the Company sets lessee's incremental borrowing. Lessee's incremental borrowing rate is settled based on average interest rates for loans of similar characteristics as lease liabilities. The Company for recalculation of assets and liabilities on 1 January 2019 applied a weighted average incremental borrowing rate of 3.27% for initial recognition in Lithuania and 2.30% for an Estonian branch. As at 31 December 2019, the weighted average interest rate on recognition of lease liabilities in Lithuania was 3.30% and 2.29% for the Estonian branch.

The Company has opted for exemptions from the IRFS 16 requirements for short-term contracts and low value leases, that is, recognizing the cost of such leases as operating leases. Short-term lease is a lease that, at the commencement date, has a lease term of 12 months or less. Low-value of underlying asset means net value which equals to or is lower than EUR 5 000.

Impact of adoption of IFRS 16 on the statement of comprehensive income when the Company is a lessee:

| | 2019 IFRS 16 | 2018 IAS 17 |
|---|-----------------|----------------|
| Depreciation of right-of-use assets: | (583) | - |
| - Land lease | (4) | - |
| - Premises lease | (579) | |
| Right-of-use assets interest | (58) | - |
| Expenses relating to short-term leases and low value assets | (516) | - |
| Lease expense IAS 17 | - | (862) |
| Total lease expense | (1 157) | (862) |

Depreciation of land as right-of-use asset is included in the statement of comprehensive income item "Acquisition costs" and depreciation of premises lease presented in an item of "Administrative expense". Right-of-use assets interest is attributed to the statement of comprehensive income, item "Financial income and expense".

On 1 January 2019 the Company recognized EUR 2 092 thousand right-of-use asset which is included in the statement of financial position, item "Property, plant and equipment", and EUR 2 092 thousand of lease liabilities included in the statement of financial position "Other liabilities".

The effect of recognition of right-of-use assets lease liabilities on the statement of financial position is presented below.

| | Lease liability |
|--|-----------------|
| Balance at 31 December 2018 | - |
| Balance at 1 January 2019 | 2 092 |
| New agreements and changes to agreements | 478 |
| Paid lease liability | (610) |
| Interest on lease liability | 58 |
| Balance at 31 December 2019 | 2 018 |
| Short-term | 545 |
| Long-term | 1 473 |

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

Breakdown of current and non-current lease liabilities:

| | Lease liability |
|-----------------------------------|-----------------|
| Short-term (payable up to 1 year) | 545 |
| Up to 3 months | 144 |
| From 3 months to 1 year | 401 |
| Long-term (payable after 1 year) | 1 473 |
| From 1 to 2 years | 417 |
| From 2 to 3 years | 251 |
| From 3 to 4 years | 223 |
| From 4 to 5 years | 219 |
| More than 5 years | 363 |
| Total lease liability | 2 018 |

The Company paid lease expenses for right-of-use assets for the total amount of EUR 610 thousand during 2019, which are attributed to the item "Amounts from other financial activities" in the statement of cash flows.

Leases where the Company is a lessee

The Company leases premises and classifies those leases as operating leases as it does not transfer substantially all the risks and rewards of the asset. Premises subleases are short-term or low value assets and are therefore classified as operating leases.

| | 2019 | 2018 |
|-----------------------|------|------|
| Premises lease income | 164 | 213 |

The table below provides an analysis of the off-balance sheet receivables for undue operating lease payments as at 31 December 2019. Undiscounted amounts receivable after the reporting period from operating leases are disclosed.

| | Receivable amounts |
|-------------------|--------------------|
| Up to 1 year | 195 |
| From 1 to 2 years | 117 |
| From 2 to 3 years | 115 |
| From 3 to 4 years | 115 |
| From 4 to 5 years | 52 |
| More than 5 years | - |
| Total | 594 |

For the year ended 31 December 2019

(All amounts in thousands of euro unless otherwise stated)

39. SUBSEQUENT EVENTS

On 11 March 2020, the World Health Organization declared the coronavirus outbreak a pandemic, and the Lithuanian government announced nation-wide quarantine since 16 March 2020. Responding to a potentially serious threat the COVID—19 presents to public health, the Lithuanian government authorities have taken measures to contain the outbreak, including introducing restrictions on the cross-border movement of people, entry restrictions on foreign visitors and the 'lock-down' of certain industries, pending further developments. In particular, airlines and railways limited international transport of people, schools, universities, restaurants, cinemas, theatres and museums and sport facilities, retailers excluding food retailers, grocery stores and pharmacies were closed. In addition, certain major manufacturers in the automotive industry decided to shutdown their operations in European countries. Some businesses in Lithuania have also instructed employees to remain at home and have curtailed or temporarily suspended business operations.

The wider economic impacts of these events include:

- Disruption to business operations and economic activity in Lithuania with a cascading impact on both upstream and downstream supply chains;
- Significant disruption to businesses in certain sectors, both within Lithuania and in markets with high dependence on a foreign supply chain as well as export-oriented businesses with high reliance on foreign markets. The affected sectors include, among others: trade and transportation, travel and tourism, entertainment, manufacturing, construction, retail, education and the financial sector;
- Notable temporary decrease in demand for non-essential goods and services;
- An increase in economic uncertainty, reflected in more volatile asset prices and currency exchange rates.

On 16 March 2020, the Lithuanian government announced a State aid program to counter the negative effects of the outbreak of COVID-19 on the economy. The details of the programme and its eligibility criteria are yet to be clarified.

The Company operates in an insurance sector that has not been significantly affected by the outbreak of COVID-19 and over the last few weeks the Company experienced a moderate effect on sales while its operations including supplies were uninterrupted. Based on the publicly available information at the date these financial statements were authorized for issue, Management considered several severe but plausible scenarios with respect to the potential development of the outbreak and its expected impact on the Company and economic environment in which the Company operates, including measures already taken by the Lithuanian government and governments in other countries, where the Company's major business partners and customers are located. Within those scenarios, Management considered a number of operating risks that may adversely affect the Company, including likely recession in the Lithuanian economy that would significantly reduce the purchasing power of consumers resulting in a reduction of the Company's business volumes.

In order to mitigate the risks resulting from potential adverse scenarios, Management started to implement the measures, which notably include preventive actions to ensure staff safety and uninterrupted customer service by successful implementation of work from home programme on a rotational basis for a significant group of administrative employees as well as employees in sales and claims departments.

The Management is of the view that the liquid investment portfolio as disclosed in Note 34 of the financial statements, and the capital position, which as at 31 December 2019 was notably above the regulatory requirement, should serve as a basis to potential future negative impacts from the ongoing developments affecting Lithuania and the wider region.

In summary, based on currently publicly available information, the Company's current KPI's and in view of the actions initiated by management, we do not anticipate a direct immediate and significant adverse impact of the COVID–19 outbreak on the Company, its operations, financial position and operating results. We cannot however preclude the possibility that extended 'lock-down' periods, an escalation in the severity of such measures, or a consequential adverse impact of such measures on the economic environment we operate in will not have an adverse effect on the Company, and its financial position and operating results, in the medium and longer term. We continue to monitor the situation closely and will respond to mitigate the impact of such events and circumstances as they occur.

In spite of possible effects of the outbreak of the COVID-19 pandemic as mentioned above, the Management concluded that the Company will have sufficient resources to continue for a period of at least 12 months from the reporting date, Management's use of the going concern basis of accounting is appropriate.
