Tegevusaruanne

Finantstulemused:

2023. aastal ulatus Lemon Gym OÜ käive 819 tuhande euroni, kasvades 2022. aasta 600 tuhandelt eurolt. Aasta lõppes aga 218 tuhande euro suuruse kahjumiga. Plaanid on paigas kasumlikkuse saavutamiseks ja rahanduse stabiliseerimiseks aastateks 2024–2026.

Strateegilised algatused:

Ettevõte keskendus 2023. aastal tulude suurendamisele, tõstes liikmehindu ja juurutades lisateenuseid nagu rühmatreeningud. Edaspidi on Lemon Gym OÜ eesmärk säilitada need strateegiad, töhustada jõupingutusi liikmete säilitamiseks ja ära kasutada klubi automatiserimisest tulenevat kulude kokkuhoidu.

Omakapitali taastamise meetmed:

Praegu arutavad aktsionärid meetmeid omakapitali taastamiseks, kuigi otsust pole veel tehtud.

Järeldus:

Lemon Gym OÜ on jätkuvalt pühendunud finantstulemuste ja tegevuseefektiivsuse parandamisele, positsioneerides end jätkusuutliku kasvu nimel tulevikus.

Greta Radzeviciene
juhatuse liige

Üldine informatsioon

The financial statements of Lemon Gym OÜ (hereinafter: the Company) for 2022 have been prepared in accordance with the Estonian Financial Reporting Standards. The basic requirements of the Estonian Financial Reporting Standard are established by the Accounting Act of the Republic of Estonia, supplemented by the guidelines issued by the Accounting Standards Board.

The financial statements have been prepared in EUR.

The income statement scheme No. 2 is used.

Raha

Cash and cash equivalents include cash balances and current account balances in the balance sheet.

Välisvaluutas toimunud tehingud ning välisvaluutas fikseeritud finantsvarad ja -kohustised

The business currency of the company is EUR. Foreign currency transactions are based on the official exchange rates of the European Central Bank on the date of transaction. The assets and liabilities denominated in foreign currencies as at 31st December of 2022 are translated into euros at the exchange rates of the European Central Bank prevailing on the balance sheet date. Gains and losses from foreign currency transactions are recognised in the income statement as income or expenses for the period.

Nõuded ja ettemaksed

Trade receivables, accrued income and other short and long-term receivables (including loan claims, deposits) are carried at amortised cost. At each balance sheet date, it is assessed whether there are any indications of impairment of these financial assets. If such features are present, the financial assets at amortised cost are written down to their present value of expected future payments. Impairment losses are recognised as an expense in the income statement.

Varud

Inventories are recognised in the balance sheet at the lower of their cost and net realisable value.

Inventories are initially recognised at cost. The cost of inventories is the fair value of cash or the non-monetary consideration paid for the asset during the acquisition or processing of the asset.

Net realisable value is determined by subtracting the estimated expenses from the estimated sales price used in the ordinary course of business that are necessary for preparing the product for sale and completing the sale.

The impairment losses of inventories are recognised as a cost of goods and services sold during the reporting period.

The FIFO method/individual evaluation method/weighted average cost method is used to expense inventories.

Materaalsed ja immateriaalsed põhivarad

Items of property, plant and equipment are recognised in the balance sheet at cost. Assets with a useful life of more than one year and cost of over EUR 150 that are used in the company's own operations are considered as items of property, plant and equipment. Assets with a useful life of more than 1 year but with cost of less than EUR 150 are recognised as low-value items in inventories (expenses). The low-value items that have been expensed are accounted for off-balance sheet.

Depreciation is calculated using the straight-line method. The depreciation rate is determined for each item of property, plant and equipment depending on its useful life.

For the assets with a significant residual value, only the depreciable portion between the cost and residual value is depreciated over the useful life of the asset.

If an item of property, plant and equipment consists of distinct components with different useful lives, these components are recognised as separate assets in accounting, and separate depreciation rates are determined in accordance with their useful lives.

Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management and it is performed until complete depreciation of the depreciable portion or until the asset's complete removal from use. Depreciation of the asset temporarily removed from use is not suspended.

At each balance sheet date, the depreciation rates, depreciation method and terminal value are evaluated to determine their reasonableness. If the recoverable amount of the non-current asset (i.e. higher of the fair value (less costs to sell) and value in use) is lower than the carrying amount, the items of property, plant and equipment are written down to their recoverable amount.

Recognition of property, plant and equipment is terminated in the event of the transfer of the asset or in case the use or sale of the asset is no longer expected to be economically viable. Gains or losses arising from derecognition of property, plant and equipment are recognised in other income or other expenses in the income statement.

Intangible assets are recorded in the balance sheet at cost less any accumulated amortisation and any impairment losses. Amortisation is

calculated using the straight-line method. If the useful life of an intangible asset cannot be reliably estimated, it is assumed that its useful life is 10 years.

Põhivarade arvelevõtmise alampiir 150

Rendid

Leases are arrangements under which the lessor assigns the lessee the right to use the property for a payment or series of payments during an agreed period of time. Leases of property, plant and equipment which transfer substantially all the risks and rewards incidental to ownership to the lessee are classified as finance leases. Other leases are classified as operating leases.

The company as the lessee

Finance leases are recognised as assets and liabilities at the lower of the fair value of the leased asset and the present value of minimum lease payments. Each lease payment is apportioned between the finance charges (interest expense) and reduction of the outstanding liability. The finance cost is allocated over the lease term so as to achieve a constant periodic rate of interest on the remaining balance of the liability. The assets acquired under finance lease are depreciated similarly to purchased assets, whereby the depreciation period is the shorter of the useful life of the asset and the lease term.

Finantskohustised

All financial liabilities (trade payables, borrowings, accrued expenses and other current and non-current liabilities) are initially recognised at cost which includes all directly attributable expenditure.

They are subsequently measured at amortised cost other than derivative financial instruments with negative fair value which are recognised at fair value.

A financial liability is classified as current when it is due to be settled within 12 months after the balance sheet date. The amortised cost of current financial liabilities generally equals their original invoice amount, therefore current financial liabilities are recognised in the balance sheet at the amount payable.

For calculating the amortised cost of long-term financial liabilities, they are initially recognised at the fair value of the consideration received (less any transaction costs), calculating interest expenses on the liability in subsequent periods using the effective interest rate.

Tulud

Revenue is recognised at the fair value of the consideration received or receivable, taking into account all discounts and discounts received. Revenue from the sale of goods is recognised when all material risks of ownership are transferred from the seller to the buyer, the sales revenue and transaction costs can be reliably determined and the receipt of the transaction revenues is probable. Revenue from the sale of a service is recorded after the service is provided, or if the service is provided for a longer period, based on the stage of completion method.

Kulud

Cost on goods is recognised when the costs related to the sale can be reliably measured. The costs of providing the service are reflected in the provision of the service during the same period.

Maksustamine

According to current legislation, the annual profit earned by entities is not taxed in Estonia; therefore neither deferred income tax receivables nor liabilities exist. Instead of profits, the dividends payable from retained earnings are taxed in Estonia with the tax rate of 20/80 on the amount paid out as net dividends. The corporate income tax arising from the payment of dividends is recognised as a liability and an income tax expense in the period in which dividends are declared, regardless of the period for which the dividends are paid or the actual payment date. From 2019, the dividends to be paid out regularly shall be taxed with the partially reduced tax rate of 14/86 (regular rate: 20/80). This reduced tax rate shall be applied to dividend payments that have been taxed with the 20/80 tax rate. One third of the retained earnings distributed over the last 3 years shall be taxed with the reduced tax rate. If the company pays dividends to physical persons that have been taxed with the rate of 14/86, the company shall additionally withhold income tax of 7% (depending on the residency of the recipient).

Seotud osapooled

The company's annual report has been considered related parties:

- a. owners;
- b. associates;

- c. executive and senior management;
 d. close family members of the persons listed above, and companies controlled by them or significantly influenced by them.
